Project details

Project name	Merton Meadow Hereford
Short description of the project	From the 10th to the 14th of June 2013 Oxford Archaeology (OA) carried out a trial trench evaluation in and around Merton Meadow car park in Hereford. The evaluation was commissioned by CgMs Consulting and consisted of five trenches. The two trenches within the southern part of the car park revealed former channels, the infilling of one dating to the mid twentieth century, the others undated. A trench adjacent to Widemarsh Street revealed the remains of several phases of late post medieval buildings respecting the street frontage, and a culverted channel of nineteenth century date. A single small undated ditch of probable recent date was revealed in one of the two trenches within the north of the car park.

Interpretation/Discussion:

E-W aligned wall in the southern half of the trench.

*Survives quite high on the eastern side, ~~and~~ roughly 500mm into the trench, ~~where~~ there seems to be a doorway (or such like), which has ~~as~~ subsequently been blocked by *104*. There is also a space beneath the doorway. Only one course of stones separates the two, which appears to have been purposefully constructed - ^{this is} ~~quite~~ difficult to interpret without further excavation. Post-Med building?*

Interpretation/Discussion:

L' shaped wall built up off earlier walls 103 + 105. Separate facing north.
Block the possible doorway in 103 but still leaving a small recession. This
wall runs along the south side of 103 across the whole trench + then turns north up
the western section. Bricks appear to be 18th/19th.
Part of a Victorian terraced building?

② 300 x 260 x 100 mm (max)

③ Roughly level.

④ random ⑤ Wall

⑥ 2, south & east.

⑦ Compact, light whitish grey mortar with sand, charcoal + lime inclusions.

⑧ 1.75m E-W, 1.70m N-S, 0.45m wide, 0.16m deep (2 courses.)

STRATIGRAPHIC MATRIX

Interpretation/Discussion:

'L' shaped wall running across whole trench E-W and turning south along western section, under 103 + 104. Clearly one of the earlier phases of construction, but has been used to build the brick culvert, 106 to the north.

STRATIGRAPHIC MATRIX

Interpretation/Discussion:

L shaped wall at northern end of Trench 1. Bricks are moulded rather than hand shaped. The turn of the wall is not at 90°, ~~more~~ but is ~~slightly~~ more open on the inside.

Bricks appear to be 18th / 19th. Culvert 106 has been built up on the southern side of this wall.

STRATIGRAPHIC MATRIX

Interpretation/Discussion:

Only seen in section it is difficult to interpret this structure. It may have been part of a floor relating to wall 1104 but may also just be part of the levelling back fill. The 2 courses of brick sandwich a course of flat limestone slabs; a unique structure in this trench, which makes it unlikely to have been part of a collapsed wall.
