Project details

Project name	The Turl Bar, Turl Street, Oxford
Short description of the project	In July and September of 2011 Oxford Archaeology (OA) carried out a programme of archaeological watching brief, building survey and excavation at the Turl Bar, to the rear of the Mitre Inn on Turl Street, Oxford. Excavation work revealed the undisturbed pre-town ground surface at a comparable level to that seen in previous work in the area. It was overlain by an undated mortar floor surface which in turn was cut by a series of inter-cutting Late Medieval/Post Medieval pits. The foundations of two Post-Medieval walls were also recorded.

Project details

Project name	The Turl Bar, The Mitre Hotel, Oxford
Short description of the project	In July 2011 Oxford Archaeology (OA) undertook a small programme of building recording at the Turl Bar, to the rear of the Mitre Hotel on Turl Street, Oxford. Although the Mitre Inn itself is a Grade II* listed building of national significance the Turl Bar forms a less historic extension constructed in c.1925-6 on the site of the coaching inn's former stables. The building is still of some interest due to the wider significance of the complex and also because it is of some architectural merit in its own right being constructed in a period style. The building also incorporates a small section of earlier timber framed wall which appears to have survived from a former building on the site and this has been recorded in the current work. The frame was examined after the partial removal of modern plaster and evidence suggested that it was an in-situ fragment of historic wall rather than a modern construction reusing old ex-situ timbers. A contemporary account of the construction of the building from the 1920s states that the new building incorporated 'the interesting relic of one of the original stable walls, with timber framing and plasterwork' so presumably this is the fragment exposed in the current project. The recording in the current study has included an element of watching brief, undertaken after the removal of modern surfaces and this aspect of the investigation has not identified any other surviving fragments of building which pre-date the 1920s construction. © Oxford

OXTUBK11

15th JULY
2011

SITE NOTES

- (A) skill the (15 July) Mid 20th brick, conc. flat slab roof with vertical plating on top. LPG store inside
- (B) - skill the (15 July) - Recent Pergola type structure for bus.
- (C) Log of Oxford cast iron electrical upstand thing.
- (D) Recent shed type cupboards/containers store.
- (E) Mainly stone wall, rubble, painted black, some render, brick above (for adjacent building). Also some brick facing.

Notes.

V. Fragmentary survival

all wire mesh render/plaster on both sides - in historic plaster

RSS directly above so certainly doesn't lie into any larger frame

lots of areas where modern cables etc cut thru

~~Plan below~~

I think it is a rebuilt mesh max of older slabs/members. (then I change my mind on this)

Not clearly pegged

Some bits obscured - esp. by remain wire mesh

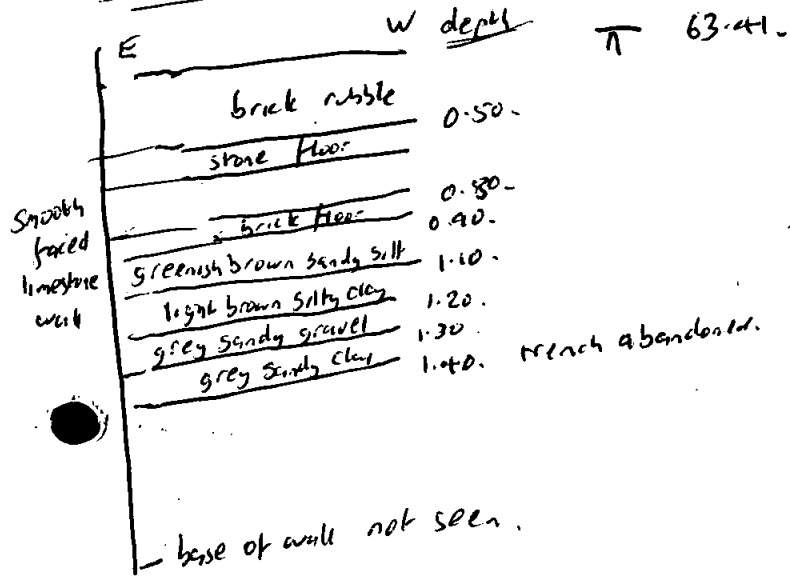

Not high studs

Diff. alignment to RSS + ^{main} existing 20th buildn here so I think it does pre-date this + is not a totally fake structure

Test pit 1

- test pit 1 was a Geotech pit (1.70 x 0.70) dug down against the N-S stone wall to the E of the E wall of the Turl Bar (see sketch plan), excavated by a toothed bucket in order to see the base of the wall

Sketch section

} maybe fills of construction cut for wall or pit fills.

* also present 2 E-W brick walls
no finds.

trench abandoned at 1.40-
0161 1007-9. +15

Sketch plan
(not to scale)

key
— brick walls

Test Pit 2

- test pit 2 was a 1m x 0.70 Geotech pit. a brick floor was found at 0.80 down. the rest of the deposits were brick rubble. the trench was abandoned at 1m down.

No finds.

0161 1010-1 + 15
level at top 63.30.

Lift shaft (Summary)

A trench 2.50m x 2.30m by 1.85m deep (the size of the trench was curtailed due to concrete footings of standing buildings) was machine excavated down to 63.09m OD (to the first significant archaeological horizon) and then hand excavated down to 62.27m OD. (the impact level of the development)

A Nat brickearth/subsoil layer⁽¹⁰³²⁾ was found at 62.27m OD. It had been heavily truncated by later features. This probably was the original pre-town ground level (the level is comparable to the red brown loam original ground level found under All Saints Church, 25m to the SE - here, Nat gravel was found at 61.90m OD with 0.20-0.35m of the red brown loam over it).

A remnant of a mortar floor (1035) (0.40m x 0.20m) at 62.44m OD over a dirty subsoil foundation layer (1036) overlay (1037). It too had been heavily truncated by later features. No finds were recovered from these layers.

(2 10m timber structures were found at approximately this level under All Saints Church - see Oxford Before The University Ch.5. Thus it is conceivable that the floor is Saxon or early Med).

The floor had been truncated by Med pittings. There was a series of 8 intercutting Med pits 1040 1034 1017 1013 1028 1011 1009 1019.

The upper fill of pit 1011 was cut by a possible E-W wall foundation 1024. Only 1 course survived and it had been heavily truncated by later features.

The pits were cut by a large (19th) pit 1004 which covered $\frac{2}{3}$ of the trench. It was sealed by a garden soil (1003).

The garden soil was cut by the foundation of a N-S wall (1001). (This wall could be seen incorporated into the standing building to the N of the trench).

It was overlain by modern deposits (1000) related to the recent toilet block on the site.

sketch plan of early phase

Description (See check lists):

STRATIGRAPHIC MATRIX

- General number issued to Modern concrete floor, make-up and concrete sewer pipes.

- Garden soil (1003) & wall 1001 is heavily impacted upon by drains & floor with small patches of both remaining - see plan 1000.

- removed with breaker & digger.

Interpretation/Discussion:

- Modern building, sewers & floor.

Lincoln College
 Turl Bar Refurbishment
 Existing Ground Floor Plan

Check all dimensions and verify on site. Report any errors or omissions.

Drawn by: HT
 Date: 11/10/07
 Drawing No: A4/A2

- ① Plant room, rough character painted brick N wall, rounded other walls, exposed ceiling rafters, old boilers
- ② Plastered walls & ceiling storage & light plant 2 rooms - the larger on north tiled walls tubes & fittings for former beer kegs.
- ④ - lots of timber cladding
- ③ tall thin ceiling joists 1920s, chicken wire round/plate.

Mock Tudor cladding with older wall tiles beneath exposed (1960s?)

tile cladding - kitchen area

(ramps from stairs)

www.acp-architects.co.uk

- (A) Skill the (15 July) Mid 20th brick, conc. flat slab 'roof' with electrical 'plant' on top. LPG store inside
- (B) - skill the (15 July) - Recent Pergola type structure for bus.
- (C) Lucy of Oxford cost in electrical upstand thing
- (D) Recent, shed type cupboards/containers store
- (E) Mainly stone wall, rubble, painted black, some render, brick above (for adjacent building). Also some brick facing.

V. Fragmentary survival
 all wire mesh render/plaster on both sides - in historic plaster
 RSS directly above so certainly doesn't lie into any larger frame.
 Lots of areas where modern cables etc cut thru.

~~Main beam~~
 I think it is a rebuilt with mix of older studs/members. (then I change my mind on this)

Not clearly pegged

Some bits obscured - esp. by remain wire mesh.

Not high studs

Different alignment to RSS + ^{main} existing 20th building here so I think it does pre-date this + is not a totally fake structure
