Project details

Project name	Land East of Aylesbury, Broughton Crossing, Bierton
Short description of the project	In September 2011, Oxford Archaeology South (OAS) carried out an archaeological evaluation, on behalf of Barratt Strategic, on two fields to the east of Aylesbury at Broughton Crossing, Bierton, Buckinghamshire. The evaluation comprised 11 trenches measuring 50m in length, eight of which targeted visible earthworks or crop marks which may be associated with Worlds End Green medieval site. The investigation revealed the truncated remains of a medieval ridge and furrow agricultural system. The majority of the low earthworks, which are present in the western field, were not associated with below ground archaeological features. In one case, a layer of limestone rubble forming an earthwork contained fragments of post-medieval peg tile. It is possible, therefore, that the cropmarks and earthworks in this field form part of a post-medieval agricultural landscape superimposed on the earlier medieval system of ridge and furrow agriculture. In the eastern field, faint traces of former furrows were recorded, perhaps corresponding with a recorded cropmark. Elsewhere in the field, the recorded cropmarks did not correspond with any below ground archaeological features and probably result from later agricultural practices.
Project dates	Start: 26-09-2011 End: 30-09-2011
Previous/future work	Not known / Not known
Any associated project reference codes	BRWOE11 - Sitecode
Any associated project reference codes	AYBCM:2011.241 - Museum accession ID
Type of project	Field evaluation
Current Land use	Cultivated Land 4 - Character Undetermined
Monument type	FURROW Uncertain
Monument type	GULLY Uncertain
Significant Finds	POTTERY Medieval
Significant Finds	POTTERY Post Medieval
Significant Finds	CBM Post Medieval
Significant Finds	CBM Medieval

Archive Submission sheet for: site code: BRWDE11

When submitting project records to Archive Dept. for either security copying or final archiving please can Project Managers ensure that *all* the records are submitted. Not submitting vital records will increase archive costs and delay the archive process. The records include:

1. Copy of WSI and archaeological brief in hard-copy and note the digital file path to digital version.
2. Final report – this must be complete and with all colour drawings in hard copy. Spiral *not* heat bound. Please also give file path to full final digital PDF. **Please note if the report can be added to the on-line library (E-prints) & OASIS.**
3. All site records – site diary, context checklists & sheets, all plans & sections with index, all small finds lists, stone lists, wood lists etc. All reports e.g. geophysical, borehole, magnetometer etc. & notes. Please make sure all originals have been recovered from Geomatics or Graphics as appropriate.
4. All photo records – B/W contacts, slides, index etc. Any additional images taken of finds etc. during PX should also be included.
5. For finds and environmental data please ensure that the file path to the report is included and also ensure that the specialist has supplied copies of their catalogue and metadata or file-paths thereof. (Environmental processing sheets and finds box lists will be collected by the Archive Dept. during archiving)
6. Human remains catalogues and reports must be included in records submitted and the digital files path and metadata to them.
7. Please ensure that the Geomatics Dept. have produced an overall site plan, in an acceptable scale, with NGR points noted. Some museums or HER's require specific plan outputs in digital format. Please make sure you have the correct format for the receiving archive repository to the site.

CHECKLIST OF ITEMS TO INCLUDE

If a particular category does not exist please make a note
