SITE ^{ST LUKES} ISLINGTON OLROO	CONTEXT RECORD ADDITIONAL SHEET	Context No. 
---	--	---

CHEST TOMB to north-west of church yard. No trace of inscription surviving. 4 sided with overhanging stone coping. South side brick - mainly yellow, some red. Average size 22cm x 7cm, Machine-made (19th) Stretcher bond. Hard cement-based grainy mortar.

Other 3 sides stone. Fairly plain, partly due to corrosion. All very worn. East side has simple vertical roll moulding 7.5-9.5cm in from N+S edges. W. side has faint trace of similar. Tomb surrounded by gravel/shingle. Coping limestone slab. Plinth surrounding tomb apparently formed of 3 pieces limestone, ie sides form single sections (see sketch below).

--	--	--

Inscription to south face — " Thomas Hanby esq late of Hackney died Dec 1786 Aged 74 years. Here lyeth the body of Mary widow of the above named Thomas Hanby esq who died 14th day of January 1797 aged 75 years ~~and~~ also of Godfrey Shewell late of this parish and likewise daughter of William Carlson senior esq formerly of this parish "

SITE OLR00 ST LUKES, ISLINGTON	CONTEXT RECORD ADDITIONAL SHEET	Context No. 7
<p>Overall crypt. 4 bays wide (aligned E-W) brick-built. 3 spine walls each one with 3 vaulted openings in line other openings. Primary mortar soft, white. Southernmost bay not used for burials, other 3 bays used for burials and floor level consequently significantly (c. 1m) higher. The 3 bays used for burials contain many individual vaults 'family' vaults apparently all in early - mid 19th (suggested by name plaques + memorials). Each bay barrel vaulted. Two outer 'spine walls' (ie between bays 1+2 and 3+4) buttressed by red primary buttresses (36cm deep). Some of these appear to have been removed and those at SE corner of building replaced/enveloped by larger modern brick buttress.</p>

CONTEXT RECORD ~~ADDITIONAL~~ SHEET

Context No.

8

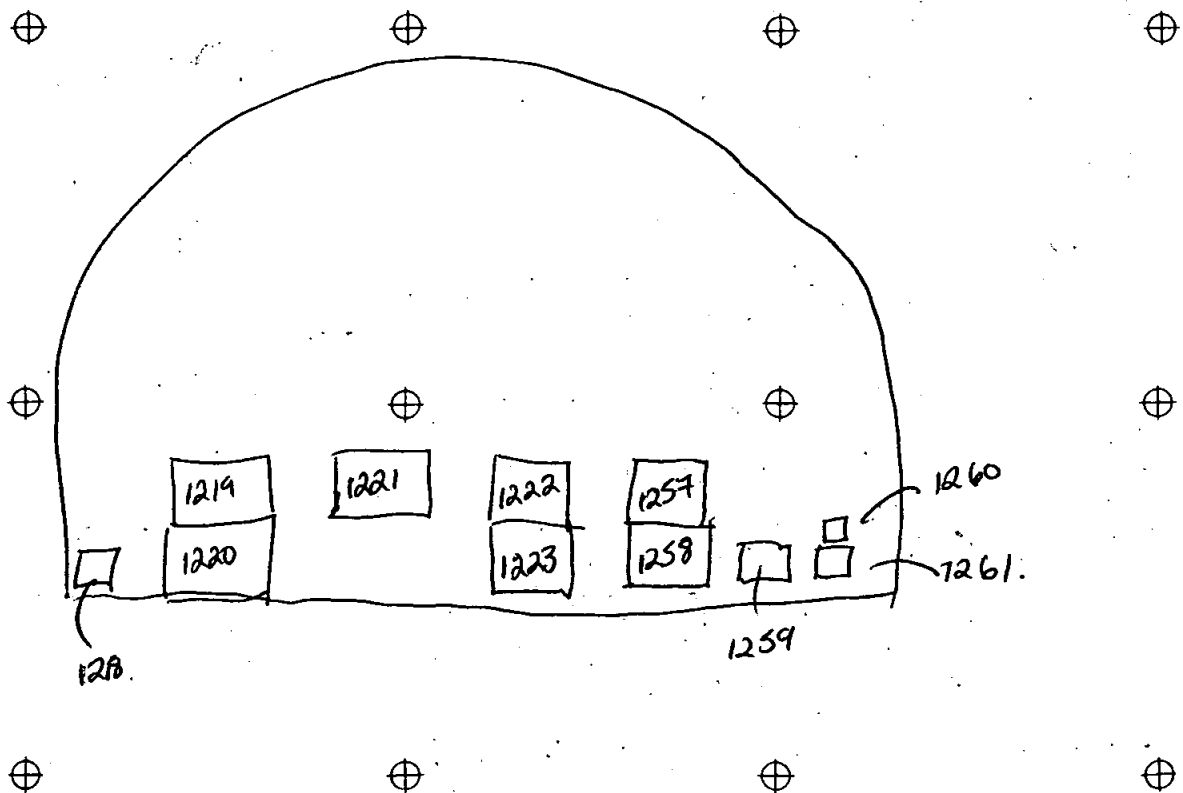

Individual ^{burial} Vault at E. end of Bay 4. Brick, painted white, with medium soft white mortar. Clearly abuts barrel vault and slightly coming away in parts. Two, projecting 'entrance' piers with wrought iron grille between. Grille consists of vertical circular section bars and 4 horizontals, one at $\frac{2}{3}$ height & 2 towards base and top, orched bar. 5 bars from largest section removed, presumably by grave-robbers. ~~Wall~~ Front wall to N at right angles to spine of crypt, wall to south angled ~~to~~ so as not to abut the now-blocked opening to Bay 3. Wall to N abuts what appears to have been a former opening in N, 'external' wall although the 'blocking' mortar + brick is v. similar to pining mortar. Circular, former opening in E wall, within vault, v. similar to that at E end of Bay 1. This one blocked with modern brick + cement mortar. Iron lining encircling inner face of opening still in situ. No memorial/inscription survives. Feature possibly early 19th.

Bress vault plaque retrieved during demolition reads:

"THE FAMILY VAULT OF J & H CLARKE 1825"

(Containing: 1218, 1219, 1220, 1221, 1222, 1223, 1257, 1258, 1259, 1260 & 1261,

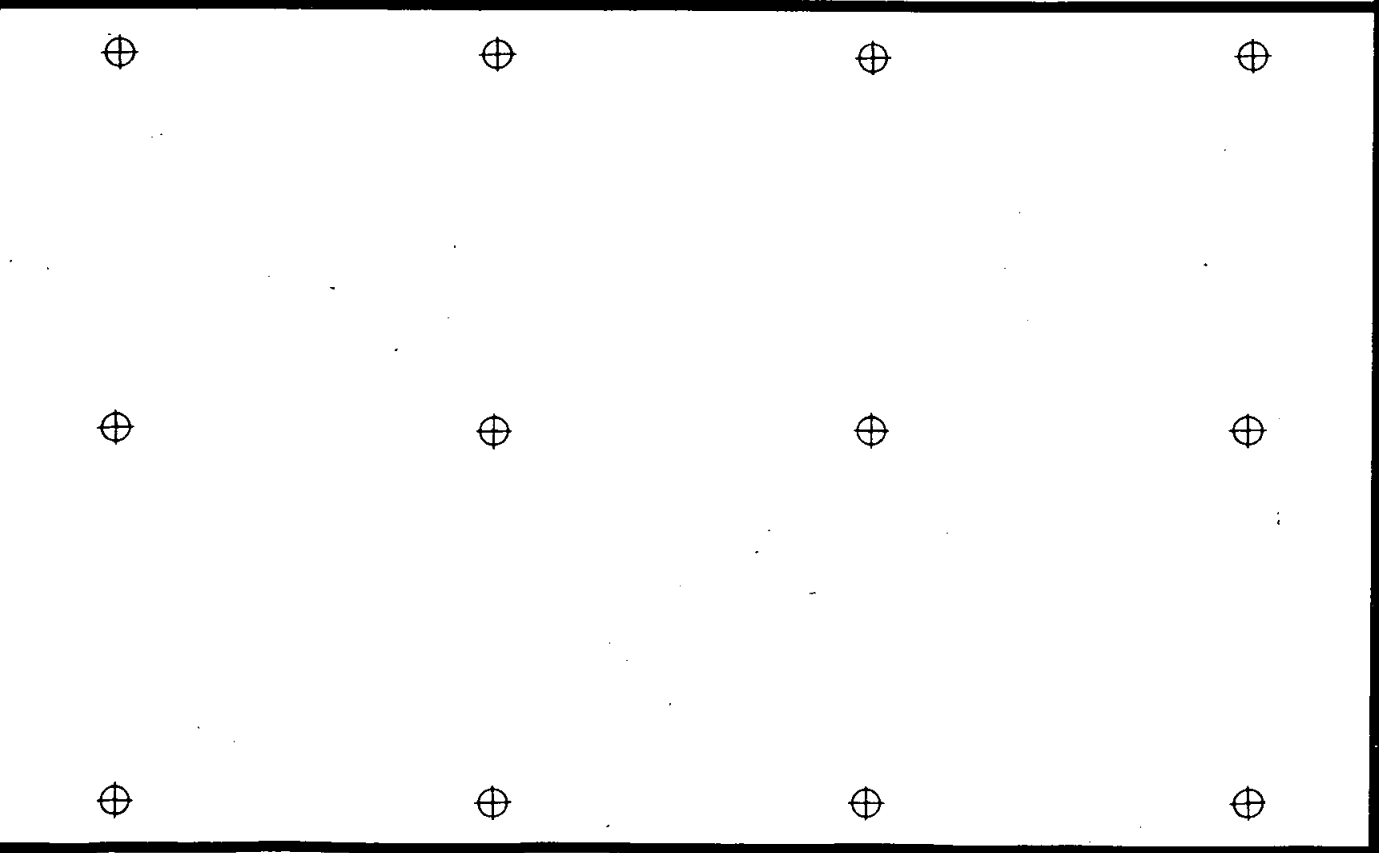

vault has unworked brick floor.

Description (See check lists):
E-W orientated revetment of stone slabs (Yakstone?) running parallel to north facing wall of church.
Slabs - various sizes from 0.3x0.4m → 2x0.95m + 0.06 - 0.11m thick

Some poss' reused ledger stones but no inscriptions visible on upper surfaces.
 Set on 0.3m high base of stone slabs ^{(and bricks to west end).} - roughly 3 courses visible. to south bordered by a Yakstone path to north holds back soil of graveyard.

Interpretation/Discussion:
 From each end, an arc of granite blocks, c. 0.25x0.25 square, edge paths converging on northern gateway to graveyard. stone slabs mortared with cement but granite blocks free standing - they respect tomb [2].

Poss the revetment, edging to paths created after burials had raised the ground level slightly in the graveyard - hence the need for a slight revetment to the north of the church wall.

Description (See check lists):
Brick vault - arch - N-S, internal measures
4.80 x 4.15 m, Bricks red 0.23 x 0.105 x 0.06
m - lime mortar - const' V' similar to main crypt vaults. 2 brick pillars against ~~east~~ wall (internal). Well constructed arch reveals main church wall on south side - vault wall butts church wall - not tied in. - corresponding arch seen in crypt vault so prob' intention was to knock wall thru & join vestry vault with main crypt but this never done. never used?

```

Interpretation/Discussion: Brick Arched Vault under Vestry
 walls/arch - mainly stretcher/header alternate courses.
 blocked entrance (exit!) in West wall with structure 559 outside forming a pillar 'well' for steps but base of vault - chips of brick/mortar - does not appear to have been used. (Blocked entrance overlain by vestry steps so could not have been used after vestry steps put in.
 Vandal hole 40cm square in ceiling & 1993? Penny found but no other damage?

Finds (tick): None Pot Bone Flint Stone Burnt stone Glass Metal
 CBM Wood Leather

Δ Small Finds	NB: when dug out finally on 3/10 - no floor revealed so confirmed - never used as a burial vault - no burials etc.	Recorder JS

Description (See check lists):

Slabs

Inscription:

1.9 x 1.0 x 0.01m

To the memory of
Mrs Ana Tudwell
wife of Mr Henry Tudwell
of this parish
who died June 8th 1780
Aged 42 years

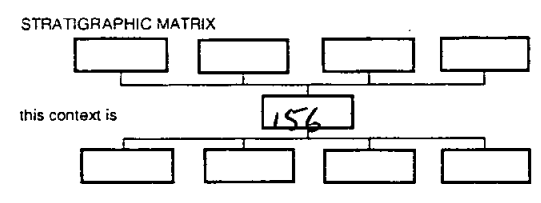

Interpretation/Discussion:

Reumbart Headstone | *Also the Above*
Mr Henry Tudwell
who died Jan^y 5th 1806
Aged 59 years.

Finds (tick): None Pot Bone Flint Stone Burnt stone Glass Metal
 CBM Wood Leather

Interpretation / Comments

.....

grips: 1 w/ fe. plate frags on rev. - partial small oval
 concave; v. badly concasted. Grips are small & similar
 to Spttds 2a. Most complete one measures
 0.13 m from terminal to terminal w/ drop of c. 0.05 m.

plate: Flatish frag of dec plate maybe from grip plate or lid motif.
 fe. with  visible on rev. so viewed from obverse
 would appear as sunken relief. c. 0.05 x 0.035 m.

up. studs: fe; 5 x frags - 3 of which are single row lengths
 the other 2 being groups of 4 studs conc. to nails.

strip a) - 5 x studs
 strip b) - 3 x studs
 strip c) - 6 x studs.

nail a) - 

nail b) -  - poss. corner
 piece.

Description (See check lists):		STRATIGRAPHIC MATRIX		
Vault - 2.20 x 1.60m framed of iron railings with 'spear' tops, set on stone kerbs c. 0.30m above floor of Bay 1 of crypt. Corner railings set into roof of crypt - railing shaped to follow curve of crypt arch. Front $\rightarrow \frac{1}{2}$ is a hinged door with 2 locks & a plaque - iron - inscription: - "The Family Vault of John Gardner, City Road". This vault enclosed by single skin breeze block wall.				
Interpretation/Discussion:				
Vault with iron railings revealed behind latter block wall in Bay 1 of crypt. presumably blocked in when Bay 1, plastered/decorated for alternative use. Initially no coffins visible \rightarrow but excavation below level of Bay 1 floor revealed coffins (CONTAINED) COFFINS 725-728 AND 762-764. 762 HAD VAULT WALL AND WAS BUILT OVER IT - see loss. 762-764 WERE BUILT WITHIN LARGER CUT & THEN VAULT CONSTRUCTED AT LATER DATE?

Description (See check lists):

Brick vault measuring: - 2.40 x 1.40m (internal)

Bricks: - 0.22 x 0.105 x 0.065m

Mortar: - Hard, grey with lime? inclusions.

Arched entrance (blocked with brick) in W facing wall.

Small stone plaque in north wall: - Inscription → W. WOOD Gent. 1756
contained 6 burials in lead coffins

Walls 0.33m thick - west wall incl a single 'skin' which sealed entrance.

'Raised' floor (above main floor of Bay 1) of brick.

Interpretation/Discussion:

Brick vault in SE corner of Bay 1 of crypt.

- Walls tied in to main crypt structure - prob constructed at same time as main crypt - uses other walls of crypt / roof to form vault.

- vault wall had into 'blocking' to 'arch' in line with passageway across this crypt bays - this prob similar to corresponding feature in N wall of church i.e. an arch intended to be knocked out to an outer vault/crypt but never actually completed.

Interpretation / Comments

.....
.....

a) = pewter; tin dipped.

AR00

307

grip plate

a) - almost complete except grip is missing. Fixed w/ small Fe screws/nails. Block enamelled obverse. measures 0.23 x 0.16 m. ~~Similar to~~ (Sptfdo 31) see below.

'sun rays' instead of husk flower goeland border.

bolt hole for grip

b) = silvered tin.

grip plate

b) - poorer condition & also grip missing but bolt-holes & Fe. skining on obverse show where it was. Velvet still sticking to reverse. different fabric & design from grip plate a) - perhaps mixed set for head & foot / side panels? Block enamelled obverse. Velvet is double thickness round remaining Fe. fixing pin. measures 0.21 x 0.13 m. 'Kidney' shaped cartouche. Similar to Sptfdo 6, but no winged cherubs head, with rococo type design round cartouche. (no match)

see next page for proper sketch.

1 x badly conc. grip

SITE OL100.	CONTEXT RECORD ADDITIONAL SHEET	Context No. 496 CONT.
----------------	---------------------------------	--------------------------

The Vault 496 Appears to have been constructed for the burial of Coffins 497 + 535 + By chance (or design?) overlay the grave cut containing coffins 599 + 600.

That this may have been deliberate is attested to by the fact that both 497 + 600 appear to have the same surname 'Lonie' (certainly on 600, though possibly 'Jones' or 'Love' on 497) - a bit unclear. - DNA testing could shed light on the matter.

North Side of which Appears Damaged by Spade - possibly South Side of Grave but for 599 + 600
