Proposed Works at Romano British Temple, North of Woodeaton, Islip
Design Brief for Archaeological Watching Brief

1. SUMMARY OF BRIEF:

- 1.1 This brief provides the outline framework on which a detailed specification of work should be based. It is advisable that archaeological organisations forward the specification to the County Archaeological Officer or his representative for validation before submitting costed proposals to the agency commissioning the Watching Brief.
- 1.2 A formal programme of archaeological observation and investigation shall be conducted during any operations on site that may disturb or destroy archaeological deposits. Significant features to be hand cleaned and sample excavated.

2. BACKGROUND:

2.1 Site Location and Description

- 2.1.1 The site is located to the North of Woodeaton and SW of Noke, to the West of Oxford (SP 5354 1263). The site lies at approximately 95 - 100m above OD and the underlying geology is shown as Alluvial. The site is currently in arable use.

2.2 Planning Background

- 2.2.1 Scheduled Ancient Monument has been granted for a water pipe trench to be excavated along the northern side of the monument and three water troughs within the monument. Due to the possibility of below ground archaeological deposits being disturbed during the development a planning condition requiring an archaeological watching brief has been attached to the permission. A separate condition states that the trench will be no more than 600mm deep and 200mm wide. This brief sets out the requirements for this archaeological recording.

2.3 Archaeological Background

- 2.3.1 The scheduled site (SAM 107) contains the remains of a C1st Roman temple, reconstructed in the middle C2nd, and enclosed by rectangular Temenos. A geophysical survey confirmed the plan of the temple and located a circular building outside the Temenos and a further, possibly rectangular, building was also identified to the south of the Temenos. Numerous Romano British finds, including votive objects have been recorded from the site. The site was the subject of a field walking survey, carried out at the request of the then owners, which identified three phases of activity: early prehistoric, as indicated by a thin scatter of worked flints, later prehistoric identified by Late Bronze Age and Early Iron Age pottery, and Roman by widely distributed pottery with detectable concentrations. The late prehistoric and R/B remains extend east outside the SAM boundaries.
- 2.3.2 Oxford Archaeology excavated 13 trenches across the site which revealed dense Early Iron Age occupation at the northern end of the assessment area which diminishes to the south/southwest. The features comprised of postholes, pits and gullies which were relatively well preserved. The evaluation also found an unusual

WOODLAF

CULTURAL SERVICES

003

01865910187

lack of disturbance by Middle Iron Age or later activity. The limit of occupation was not reliably defined within scope of study.

- 2.3.3 The temple is within a wider area of archaeological potential with Islip Roman Villa, another Scheduled Ancient Monument (SAM 23136)(SP 5330 1347), located 600m N of the site and a find spot of Roman pottery and building material (PRN 11632)(SP 5320 1290) recorded 350m North of the temple suggesting further buildings of this date in the immediate vicinity of the temple complex. A Roman field system has been recorded from aerial photographs immediately N of the Villa site (PRN 11609)(SP 5338 1365). Numerous findspots of prehistoric lithic's have also been recorded in the area (PRN 11631, 14354 & 14359) which include Mesolithic material.

3. REQUIREMENT FOR WORK:

- 3.1 This Archaeological Watching Brief has been required in accordance with PPG16 because of the presence of known sites of archaeological interest within the immediate vicinity of the development.
- 3.2 The requirements are for a formal programme of observation and investigation conducted during any operations on site that may disturb or destroy archaeological deposits. The programme will result in the preparation and dissemination of a report and ordered archive. Archive deposition, publication and dissemination should follow the guidelines outlined in Annexes 2, 4, 5 and 6 of the Evaluation Brief.
- 3.3 The Archaeological Watching Brief should, within the resources available, allow the preservation by record of archaeological deposits, the presence and nature of which could not be established (or established with sufficient accuracy) in advance of development or other potentially disruptive works.
- 3.4 It should provide an opportunity, if needed, for the engaged archaeological organisations to signal, before the destruction of the material in question, that an archaeological find has been made for which the resources allocated are not sufficient to support a treatment to a satisfactory and proper standard.
- 3.5 Should the Watching Brief encounter archaeological remains of sufficient significance, it will not replace any requirement for contingent excavation or the physical preservation of those remains.

4. SPECIFIC REQUIREMENTS:

- 4.1 A formal programme of archaeological monitoring and recording shall be permanently maintained during any groundwork's during the development. This will include the stripping of overburden and excavation of foundation trenches or service trenches. Any archaeological deposits revealed shall be cleaned by hand and recorded in plan before being excavated and recorded at an appropriate level.

Richard Oram
Planning Archaeologist
County Archaeological Services

9th September 2009

ANNEX 2**MONITORING ARRANGEMENTS:**

Oxfordshire County Council Archaeological Services (Directorate Environment & Economy) will monitor progress and standards throughout the project. To facilitate this, the project design should include a projected timetable on site (indicating staff grades, members and machine hire time if appropriate etc). The County Archaeological Officer and English Heritage shall be notified of the start date at least two weeks prior to commencing of work.

ANNEX 4**ARCHIVE DEPOSITION:**

1. The archive should be prepared to the minimum acceptable standard defined in MAP2 (5.4 and Appendix 3). The integrity of the archive should be maintained.
2. The contracted archaeological organisation will endeavour to ensure that the full integrated site archive including all finds (other than gold and silver declared by a Coroner's Inquest to be Treasure under the current Treasure Act) shall, with the agreement of the owners, be deposited after completion of post-excavation work with the County Museums Service (Oxfordshire Museums) unless another repository is indicated.
3. Oxfordshire Museums requires that deposited archives from developer-led archaeological work shall be accompanied by funding equivalent to the current HBMC Box Storage Grant. Archaeological organisations shall therefore include an estimate of the costs of deposition for this project in their tender. The estimated cost will be clearly shown and shall be calculated in accordance with the procedures set out in "Charge for Archaeological Archives Deposited with Oxfordshire Museums" *Oxfordshire Museums 1995*.
4. In the event of the legal owner(s) resolving to retain all or part of the site archive, they shall be responsible for the future preservation and maintenance of any material element of that archive. That part of the site archive in question, shall be transferred to the legal owner only after, all necessary processing, research, analysis and investigative/stabilising conservation and correct packing necessary to prepare the archive for preservation and storage in a useable, accessible form, and to produce a full report for publication, has been completed. The owner shall ensure that all necessary provision is made for the long-term preservation of the archive in a satisfactory environment, and that it is accessible for future research. The contracted archaeological organisation will ensure that a proper record of material kept by the landowner shall be included in the written archive, and the location and ownership of the material shall be stated in the written archive and public record. The explicit (written) permission of the owner shall be obtained for the latter in order that the *Data Protection Act 1984* is not contravened.
5. A summary report and details of archive deposition shall be submitted to the County SMR and NMR, and a limited selection of representative photographic slides from the site archive shall be duplicated and deposited with the SMR.
6. The County Museums Service shall be notified in advance, of the expected time limits for deposition of the archive.

11/09 2009 11:21 FAX 01865810187

CULTURAL SERVICES

005

01865810187

ANNEX 5

PUBLICATION AND DISSEMINATION:

1. A copy of the summary report shall be supplied to the office of the County Archaeological Officer for verification and assessment by the CAO or his representative which will then be lodged with the County Sites and Monuments Record on the understanding that it will become a public document after an appropriate period of time (generally not exceeding six months). A copy of the report should also be sent to English Heritage at the address below.
2. All archaeological organisations should ensure that an abstract containing the essential elements of the results precedes the main body of the report.
3. Publication of the results (even if limited to one line reports on work done with negative results) should be pursued, and should take place within a reasonable length of time (normally not more than five years after completion of the work). Style and format to be determined by the archaeological organisation, with regard to agreed standards of archaeological publication, and the house style of the appropriate local, regional or national publication.
4. The report should state the location of the archive and acknowledge the curatorial role played in the project by Oxfordshire County Council Archaeological Services. It should also acknowledge any provision of information from the County Sites and Monuments Record which is copyright of Oxfordshire County Council. Any secondary reports or articles generated by this project shall similarly acknowledge County Archaeological Services and the SMR.
5. With regard to publication, the level of the report should take into account the scale of the evaluation, the overall importance of the site based on English Heritage characterisation criteria, and its status within local and regional research strategies. We would suggest that, unless evidence of national or special local significance is revealed, a summary report conforming to the minimum requirements defined in MAP2 Appendix 7.1, should be produced for publication.

Water Pipe Trench Excavation, Woodeaton, Islip, Oxfordshire

NGR SP 5354 1263

Written Scheme of Investigation for an Archaeological Watching Brief

1 Introduction

- 1.1 Scheduled Ancient Monument has been granted for the excavation of a water pipe trench along the northern edge of a scheduled site (SAM 107) near Woodeaton Oxfordshire (SP 5354 1263). Consent has also been granted for the siting of three water troughs within the monument.
- 1.2 Because of the presence of known sites of archaeological interest within the immediate vicinity of these works a condition requiring that an archaeological watching brief be undertaken during all groundworks has been attached to the consent. This is in line with PPG16 and Policy C26 of the Local Plan,
- 1.3 This Written Scheme of Investigation details how Oxford Archaeology (OA) will implement the requirements of the Oxfordshire County Archaeological Service (OCAS), laid out in a brief prepared by the County Planning Archaeologist, Richard Oram (OCAS 2010). The first part is site specific while the appendices detail general OA standards and procedures.

2 Geology and Topography

- 2.1 The site is located approximately 3 km north-east of Oxford, 500 m north of the village of Woodeaton and 500 m south-west of the village of Noke.
- 2.2 The development area is sited between 95 m and 100 m above OD and the underlying geology is alluvial in nature (British Geological Survey sheet no. 237). The site is currently under arable use.

3 Background

- 3.1 The scheduled site (SAM 107) contains the remains of a first century Roman temple, reconstructed in the second century and enclosed by a rectangular Temenos. A geophysical survey has confirmed the plan of the temple and located a circular building outside the Temenos and a further, possibly rectangular building, was also identified to the south of the Temenos. Numerous Romano-British finds including votive objects have been recorded from the site. The site was the subject of a field walking survey, carried out at the request of the owners, which identified three phases of activity; early prehistoric, as indicated by a thin scatter of worked flints, later prehistoric, as indicated by

Late Bronze Age and Early Iron Age pottery, and Roman by widely distributed pottery with detectable concentrations. The late prehistoric and Romano-British remains extend east outside the SAM boundaries.

- 3.2 Oxford Archaeology has previously excavated 13 trenches across the site which revealed dense Early Iron Age occupation at the northern end of the assessment area which diminishes to the south/south-west. The features observed comprised of postholes, pits and gullies which were relatively well preserved. The evaluation also found an unusual lack of disturbance by Middle Iron Age or later activity. The limit of occupation was not reliably defined within the scope of the study.
- 3.3 The temple is within a wider area of archaeological potential with Islip Roman Villa (another Scheduled Ancient Monument (SAM 23136)(SP 5330 1347) located 600 m north of the site and a find spot of Roman pottery and building material (PRN 11632)(SP 5320 1290) recorded 350 m north of the temple suggesting that further buildings of this date in the immediate vicinity of the temple complex.
- 3.4 A Roman field system has been recorded from aerial photographs immediately north of the villa site (PRN 11609)(SP 53381365). Numerous findspots of prehistoric lithic's have also been recorded in the area (PRN 11631, 14354 and 14359) which include Mesolithic material.

4 Aims

- 4.1 To preserve by record any archaeological remains (if present) that the development may remove or damage within the impacted area.
- 4.2 To signal, before the destruction of the material in question, the discovery of a significant archaeological find, for which the resources allocated are not sufficient to support a treatment to a satisfactory and proper standard. In this event the supervising archaeologist will halt on-site works and OA will consult with Chris Welch (English Heritage Inspector of Ancient Monuments) and Richard Oram (Planning Archaeologist, Oxfordshire County Council) to agree an appropriate resolution.
- 4.3 To make available the results of the investigation.

5 Strategy

- 5.1 The watching brief will observe *all* works that may disturb or destroy below ground archaeological remains, specifically during the excavation of the water pipe trench.
- 5.2 Provision will be made for taking environmental/organic samples in accordance with OA Environmental procedures (OA 2000).
- 5.3 Excavation of archaeological features will be undertaken to fulfil the basic

objective of retrieval of archaeological data affected by the works.

- 5.4 All features and deposits will be issued with unique context numbers, and context recording will be in accordance with established OA practices (OA Field Manual, 1992). All contexts, and any small finds and samples from them will be allocated unique numbers. Bulk finds will be collected by context. Digital, colour transparency and black-and-white negative photographs will be taken of all trenches and archaeological features.
- 5.5 Site plans will be drawn at an appropriate scale (normally 1:50 or 1:100) with larger scale plans of features as necessary. Trench plans will normally be drawn at a scale of 1:100. Section drawings of features and sample sections of trenches will be drawn at a scale of 1:20. Full trench sections will be drawn only if complex stratigraphy is present.

6 Report and archive

- 6.1 A report of the findings will be produced within three weeks of the completion of fieldwork. Copies will be sent to the client, the County Archaeological Service, the Sites and Monuments Record and to English Heritage.
- 6.2 The content and style of the report will be as defined in Appendix 8.
- 6.3 The site archive will be created in accordance with the guidelines published in Guidelines for the preparation of Excavation Archives for long-term storage (UK Inst. for Conservation 1990) and standards in the Museum care of archaeological collections - see Appendix 8. The project archive will ultimately be deposited with the Oxfordshire County Museum Service.

7 Health and Safety

- 7.1 All OA project fieldwork is undertaken in accordance with all relevant current Health and Safety Legislation. This includes in particular the following regulations (the list is not intended to be exhaustive):

Health and Safety at Work Act 1974
Construction (Design and management) Regulations 1994
The management of Health and Safety at Work Regulations 1992
Personal Protective Equipment at Work Regulations 1992
Work Equipment Regulations 1992
Manual Handling Operations Regulations 1992
Workplace (Health, Safety and Welfare) Regulations 1992

- 7.2 The OA has its own Health and Safety Policy, which refers to the manual Health and Safety in Field Archaeology (SCAUM 1997), and these two documents constitute the Health and Safety arrangements of the OA. The Director of OA is ultimately responsible under the terms of the Health and Safety Act (1974) for ensuring the safety of employees. He must know the broad requirements of relevant legislation; attend meetings of the OA Health and Safety Committee; ensure that responsibility for health and safety is

properly assigned and accepted at all levels. The Director of the OA is David Jennings.

- 7.3 The Safety Co-ordinator of the OA: represents the director on matters of health and safety; keeps abreast of relevant legislation and approved practice, and disseminates this information to OA staff; advises staff as required on matters of health and safety; maintains the OA health and safety records; calls and chairs meetings of the OA Health and Safety Committee. The Safety Co-ordinator of the OA is Dan Poore.
- 7.4 The Project Director is the person delegated to take overall charge of a particular project. He/she is responsible for health and safety matters on the projects that they manage, reporting to the Safety Co-ordinator in the first instance, and ultimately to OA's Director. He/she must be satisfied that an adequate safety plan has been drawn up for the project, or for each phase of the project. The Project Director may also be the Project Manager in some cases (see below).
- 7.5 Individual Project Supervisors/Managers are the persons delegated to take charge of a particular phase or part of the overall project. They are responsible for ensuring that for each site that they are in charge of an adequate Risk Assessment and any amendments or additions to the Site Safety Plan have been drawn up prior to work starting on site, and they are immediately responsible for the Health and Safety of employees and sub-contractors under their supervision. They report directly to the Project Director and OA Safety Co-ordinator. The manager for this project will be Dan Poore.
- 7.6 The OA Health and Safety Committee consists of the Director, Safety Co-ordinator, OA Manager and the Site Staff Representative. The Safety Co-ordinator normally calls meetings of the Committee when there is business for discussion, but may be called by other members of the committee.
- 7.7 OA's independent Health and Safety Consultants are Safety Services Ltd, Stanton Harcourt, Oxon, who are consulted with regard to matters such as deep trenching, shoring and working in confined spaces.
- 7.8 Prior to the project a Risk Assessment document is completed by the project manager and passed to the OA Safety Co-ordinator for comment. The Project Manager/supervisor ensures that the following information is available to the excavation team copy of the HSE poster 'Health and Safety Law - What You should Know', copy of the Risk Assessment, Emergency Information Sheet giving details of nearest hospital etc, copy of the Notification of Project to HSE, location of an accident book.

8 General

- 8.1 Appendices 7 and 11 are relevant.

1998 Appendices apply

Design Brief for an Archaeological Watching Brief*

OA Standard Fieldwork Methodology Appendices

The following methods and terms will apply, where appropriate, to all OA fieldwork unless varied by undertakings specified in a detailed Written Scheme of Investigation.

7 WATCHING BRIEFS

- 7.1 Ground disturbances (demolition, general site strip and levelling, reduction for roads, excavation for service trenches and foundation trenches) will be monitored by an archaeological supervisor assisted, where necessary, by archaeological technicians and under the overall guidance of a project manager.
- 7.2 All archaeological features and deposits exposed will be recorded.
- 7.3 Where only the tops of features or deposits are exposed, these will be located on a site plan, planned, and recorded by written description and by photographs.
- 7.4 Visible artefacts will be collected in order to assist in the dating of features and deposits.
- 7.5 Where trenches are excavated through cut features (pits, ditches, etc.) and vertical stratigraphy is not present, the features will be recorded in section with appropriate collection of finds.
- 7.6 Where ground disturbance exposes stratified remains or significant features, the archaeologist will excavate by hand and record these.
- 7.7 The archaeological curator will be advised at the earliest opportunity of any archaeological features or deposits that appear worthy of preservation *in situ*.
- 7.8 On completion of the fieldwork the site archive will be compiled and security copied.
- 7.9 Proposals for analysis and publication will be determined in the light of the results of the fieldwork.

RECORDING

- 7.10 All on-site recording will be undertaken in accordance with the *OA Field Manual* (ed. D Wilkinson 1992).
- 7.11 A continuous unique numbering system will be operated. Written descriptions will be recorded on proforma sheets comprising factual data and interpretative elements.
- 7.12 Plans will normally be drawn at 1:50 but in urban or deeply stratified sites a scale of 1:20 will be used. Detailed plans will be at an appropriate scale. Burials will be drawn at 1:10.
- 7.13 A register of plans will be kept.
- 7.14 Sections of features or trenches showing stratigraphy will be drawn at 1:20 or 1:10.
- 7.15 A register of sections will be kept.
- 7.16 All sections will be tied in to Ordnance Datum if possible or into the contractors TBM.

- 7.17 A black and white and colour (35 mm transparency) photographic record, illustrating in both detail and general context the principal features and finds discovered will be maintained. The photographic record will also include working shots to illustrate more generally the nature of the archaeological work.
- 7.18 Photographs will be recorded on OA Photographic Record Sheets.
- 7.19 All identified finds and artefacts from stratified archaeological deposits will be retained, although certain classes of building material or post medieval pottery may sometimes be discarded after recording if an appropriate sample is retained.

8 EVALUATION AND WATCHING BRIEF REPORTS

- 8.1 Style and format of the report will be determined by OA, but will include as a minimum the following:
- A location plan of trenches and/or other fieldwork in relation to the proposed development.
 - Plans and sections of features as appropriate located at an appropriate scale.
 - A section drawing showing depth of significant deposits (if encountered) including present ground level with Ordnance Datum, vertical and horizontal scale.
 - A summary statement of the results.
 - A table summarising per trench the features, classes and numbers of artefacts contained within, spot dating of significant finds and an interpretation.
 - A reconsideration of the methodology used, and a confidence rating for the results.
 - An interpretation of the archaeological findings within both the site and their wider landscape/townscape setting.
- 8.2 Copies of the report will be supplied to the client and the Archaeological Officer monitoring the works. Copies of the report will also be supplied to the County Sites and Monuments Record on the understanding that it will become a public document after an appropriate period of time (normally six months).
- 8.3 If the evaluation works generate archaeological results of importance which merit wider publication, the client will be consulted about further arrangements.

ARCHIVES

- 8.4 The site archive, including finds and environmental material, will be ordered, catalogued, labelled and conserved and stored according to the UKIC Guidelines for the preparation of excavation archives for long-term storage.
- 8.5 The site archive will be prepared to at least the minimum acceptable standard defined in Management of Archaeological Projects 2, English Heritage 1991.
- 8.6 The site archive will be microfilmed by the RCHME National Archaeological Record as a safeguard against the accidental loss and the long-term degeneration of paper records and photographs.
- 8.7 The site archive will be deposited with the relevant receiving Museum at the earliest opportunity unless further archaeological work on the site is expected within one year of completion of the archive. The OA will advise the landowner that any artefacts resulting from the project work should be given to the relevant Museum.

11 GENERAL

- 11.1 The requirements of the Brief will be met in full where reasonably practicable.
- 11.2 Any significant variations to the proposed methodology will be agreed with the local authority's archaeological representative in advance.

11.3 The scope of work detailed in the main part of the Written Scheme of Investigation is aimed at meeting the aims of the project in a cost-effective manner. Oxford Archaeology attempts to foresee possible site-specific problems and resource these. However there may be unusual circumstances which have not been included in the costing and programme.

- Unavoidable delays due to extreme bad weather, vandalism, etc.
- Complex structures or objects, including those in waterlogged conditions, requiring specialist removal.
- Extensions to specified trenches or feature sample sizes requested by the archaeological curator.
- Trenches requiring shoring or stepping, ground contamination, unknown services, poor ground conditions requiring additional plant, specialist reinstatement of surfaces (i.e. tarmac, turf).

HEALTH AND SAFETY and INSURANCE

11.4 All work will be carried out to the requirements of *Health and Safety at Work, etc. Act 1974*, *The Management of Health and Safety Regulations 1992*, the SCAUM (Standing Conference of Archaeological Unit Managers) H & S manual *Health and Safety in Field Archaeology 1991*, the OA Health and Safety Policy, and any main contractors requirements.

11.5 A copy of the OA's Health and Safety Policy is available on request. OA will require copies of the H & S policies of all other contractors and operators present on site in compliance with *The Manual of H & S Regulations 1992*.

11.6 The OA holds Employers Liability Insurance, Public Liability Insurance and Professional Indemnity Insurance. Details will be supplied on request.

11.7 The OA will not be liable to indemnify the client against any compensation or damages for or with respect to:

- Damage to crops being on the Area or Areas of Work (save in so far as possession has not been given to the Archaeological Contractor);
- The use or occupation of land (which has been provided by the Client) by the Project or for the purposes of completing the Project (including consequent loss of crops). Interference whether temporary or permanent with any right of way, light, air or water or other easement or quasi easement which are the unavoidable result of the Project in accordance with the Agreement;
- Any other damage which is the unavoidable result of the Project in accordance with the Agreement;
- Injuries or damage to persons or property resulting from any act or neglect or breach of statutory duty done or committed by the client or his agents, servants or their contractors (not being employed by Oxford Archaeology) or for or in respect of any claims demands proceedings damages costs charges and expenses in respect thereof or in relation thereto.

COPYRIGHT and CONFIDENTIALITY

11.8 Oxford Archaeology will retain full copyright of any commissioned reports, tender documents or other project documents, under the Copyright, Designs and Patents Act 1988 with all rights reserved; excepting that it will provide an exclusive licence to the client in all matters directly relating to the project as described in the Written Scheme of Investigation.

11.9 Oxford Archaeology will assign copyright to the client upon written request but retains the right to be identified as the author of all project documentation and reports as defined in the Copyright, Designs and Patents Act 1988 (Chapter IV, s.79).

11.10 OA will advise the client of any such materials supplied in the course of projects that are not OA's copyright.

- 11.11 OA undertakes to respect all requirements for confidentiality about the client's proposals provided that these are clearly stated. It is expected that such conditions shall not unreasonably impede the satisfactory performance of the services required. OA further undertake to keep confidential any conclusions about the likely implications of such proposals for the historic environment. It is expected that clients respect OA's general ethical obligations not to suppress significant archaeological data for an unreasonable period.

OA STANDARDS AND PROCEDURES

- 11.12 OA shall conform to the standards of professional conduct outlined in the Institute of Field Archaeologists' Code of Conduct, the IFA Code of Approved Practice for the Regulation of Contractual Arrangements in Field Archaeology, the IFA Standards and Guidance for Field Evaluations, Desk Based Assessments, etc. and the British Archaeologists and Developers Liaison Group Code of Practice.
- 11.13 OA is a member of the Institute of Environmental Assessment and the Council for British Archaeology.
- 11.14 Project Directors normally will be recognised in an appropriate Area of Competence by the IFA. For more extensive and complicated evaluation projects especially where they are part of large-scale programmes of work in historic urban centres, the procedures outlined in English Heritage's *Management of Archaeological Projects* 2nd Edition 1991 (MAP 2) will be followed for immediate post-field archive preparation and initial assessment. Agreement to then be reached, in collaboration with the local authority's archaeological representative, about what aspects will need to be taken forward to provide a report in the required format containing the information needed for planning purposes.

Our Ref HSD 9/2/14179

25 August 2009

department for
culture, media
and sport

Dear Mr Twiddy,

ANCIENT MONUMENTS AND ARCHAEOLOGICAL AREAS ACT 1979 (AS AMENDED) – SECTION 2
PROPOSED WORKS AT: ROMANO-CELTIC TEMPLE NORTH OF WOODDEATON, ISLIP, CHERWELL, OXFORDSHIRE
COUNTY MONUMENT NO: 107
APPLICATION BY: MS L M CANNON

1. I am directed by the Secretary of State for Culture, Media and Sport to refer to your application on behalf of Ms L M Cannon for scheduled monument consent dated 25 June 2009; and to the plan identifying in red the area scheduled under OX 107; the Higher Level Stewardship Agreement Map; Application Ref AG00285711, marked up to indicate the proposed route for the water pipe, the proposed location of three troughs and the new fencing submitted therewith in respect of proposed works at the above scheduled ancient monument concerning fencing and the installation of a water pipe and three water troughs. This advice is given on the basis of additional information received in a letter dated 11 August 2009 from Mr W Twiddy to Mr C Welch, Inspector of Ancient Monuments, English Heritage; and to the plan showing the proposed new route for the water pipe.
2. In accordance with paragraph 3(2) of Schedule 1 to the 1979 Act, the Secretary of State is obliged to afford to the applicant, and to any person to whom it appears to the Secretary of State expedient to afford it, an opportunity of appearing before and being heard by a person appointed for that purpose. This opportunity has been declined in your telephone conversation with Jade Hunter of the Department on 20th August 2009.
3. The Secretary of State is also required by the Act to consult with the Historic Buildings and Monuments Commission for England (English Heritage) before deciding whether or not to grant scheduled monument consent. Having received the advice of English Heritage, the Secretary of State considers that the proposed works will not significantly diminish the visual amenity of the monument but might have a significant impact on buried archaeological deposits which can be mitigated through conditions requiring archaeological recording. The Secretary of State is agreeable for the works to proceed

improving
the quality
of life for all

WOODHALP

Culture Team

providing the conditions recommended by English Heritage, and set out below, are adhered to, and accordingly hereby grants scheduled monument consent under section 2 of the 1979 Act for the proposed works as referred to in paragraph 1 above, subject to the following conditions:-

- i) The works to which this consent relates shall be carried out to the satisfaction of the Secretary of State, who will be advised by English Heritage. At least 4 weeks' notice (or such shorter period as may be mutually agreed) in writing of the commencement of the work shall be given to:

Christopher Welch
Inspector of Ancient Monuments
English Heritage
Eastgate Court
195-205 High Street
Guildford
Surrey,
GU1 3EH

in order that an English Heritage representative can have the opportunity to inspect and advise on the works and their effect in compliance with this consent.

- ii) Equipment or machinery shall not be used or operated in the scheduled area in conditions or in a manner likely to result in ground disturbance other than that which is expressly authorised in this consent.
- iii) No works shall take place until the applicant has secured a programme of archaeological work in accordance with a Written Scheme of Investigation submitted to and approved by the Secretary of State advised by English Heritage.
- iv) ~~The trench excavated in association with these works shall be no deeper than 600mm and no wider than 200mm.~~
4. By virtue of section 4 of the 1979 Act, if no works to which this consent relates are executed or started within five years from the date of this letter, the consent shall cease to have effect at the end of that period (unless it is revoked before then).
5. This letter does not convey any approval or consent required under any enactment, by law, order or regulation other than section 2 of the Ancient Monuments and Archaeological Areas Act 1979.
6. Attention is drawn to the provisions of section 55 of the 1979 Act under which any person (hereinafter referred to as the 'applicant') who is aggrieved by the decision given in this letter may challenge its validity by an application made to the High Court within six weeks from the date when the decision is given. The Grounds upon which an application may be made to the Court are (1) that the decision is not within the powers of the Act (that is, the Secretary of State has exceeded his powers) or (2) that any of the relevant requirements have not been complied with and the applicant's interest have been substantially prejudice by the failure to comply. The "relevant requirements" are defined in section 55 of the 1979 Act: they are the requirements of that Act and the Tribunals and Inquiries Act 1971.

WOODLAIF

Culture Team

and the requirements of any regulations or rules made under those Acts.

7. A copy of this letter is being sent to:

Christopher Welch
Inspector of Ancient Monuments
English Heritage

Project details

Project name	Woodeaton, Land at, New Water Pipe
Short description of the project	On the 24th February 2010, Oxford Archaeology South undertook a watching brief within the boundary of the Romano-Celtic Temple Scheduled Monument to the north of the village of Woodeaton, Oxfordshire. Archaeological observation and recording was undertaken upon the excavation of a trench for a new water pipe to supply animal drinking troughs within the field. Ploughsoil and geological deposits were observed and no archaeological deposits were encountered or affected.
Project dates	Start: 24-02-2010 End: 24-02-2010
Previous/future work	Yes / Not known
Any associated project reference codes	WOODLA10 - Sitecode
Any associated project reference codes	OXCMS:2010.11 - Museum accession ID
Type of project	Recording project
Site status	Scheduled Monument (SM)
Current Land use	Cultivated Land 4 - Character Undetermined
Monument type	TEMPLE Roman
Significant Finds	POTTERY Roman
Investigation type	'Watching Brief'
Prompt	Scheduled Monument Consent

COMMENTS

On site to monitor excavation of pipe trench across field containing SAM.

Trench dug by trenching machine 0.2m wide by between 0.5m - 0.6m deep.

Overall layer of ploughsoil (1) Brown clay loam many sub-angular limestone frags 0.2m - 0.3m deep. No subsoil or earlier ploughsoil visible.

Natural changes from red brown sandy silt clay (2) at southern end changing to yellow brown clay with grey clay flecking (3) next to pond. Combustible limestone frags in grey brown clay matrix (4) changing to well weathered limestone in dark red brown silt clay (5) towards gate.

No features visible in trench. 2 pieces of R.B. pot recovered from topsoil.

Records? **Photos plan cut sections**
