**The Old Vicarage, Moultsford**  
**Design Brief for Archaeological Watching Brief**

**1. SUMMARY OF BRIEF:**

- 1.1 This brief provides the outline framework on which a detailed specification of work should be based. It is advisable that archaeological organisations forward the specification to the County Archaeological Officer or his representative for validation before submitting costed proposals to the agency commissioning the Watching Brief.
- 1.2 A formal programme of archaeological observation and investigation shall be conducted during any operations on site that may disturb or destroy archaeological deposits. Significant features to be hand cleaned and sample excavated.

**2. BACKGROUND:**

**2.1 Site Location and Description**

- 2.1.1 The site is located in the centre of the village, on the western side of the River Thames, (SU 6027 8940). The site lies at approximately 50m above OD and the underlying geology is shown as Chalk. The site is currently in use as the garden of a Care home.

**2.2 Planning Background**

- 2.2.1 Planning permission has been granted for the erection of single storeyside and rear extensions (P09/W0028). Due to the possibility of below ground archaeological deposits being disturbed during the development a planning condition requiring an archaeological watching brief has been attached to the permission. This is in accordance with PPG 16 and the Districts Local Plan policies.

**2.3 Archaeological Background**

- 2.3.1 The site is located in an area of archaeological potential. Roman coins have been recovered from the grounds of the Old Vicarage in the 1930s (PRN 2876)(SU 5889 8394). Roman pottery was recovered from the playing fields immediately south of the application site (PRN 2878)(SU 5896 8381). Cropmarks show a trackway field system 90m west of the site, these marks are only visible in the fields west of the village but their form suggests that they carry on into the built area and very close to the application site (PRN 15356)(SU 5849 8399). The archaeological potential west of the village has been known for some time but the extent of the cropmarks and their continuation into the village was not realised until recently. A number of coffined burials, coins and pottery, all dated to the Roman period, were recovered from the fields around these cropmarks (PRN 2330)(SU 5833 8399) in the 1960s following the chance discovery of a Bronze Age Torc whilst ploughing (PRN 7644)(SU 5834 8402). Another gold Torc was recovered with a metal detectors 600m SW of the site (PRN 16497)(SU 5840 8370).
- 2.3.2 Excavation in advance of pipeline construction 300m SW of the site revealed a ring ditch pits, postholes and linear ditch which probably relate to a Late Iron Age to Roman settlement (PRN 15642)(SU 5874 8365). The site is also to the west of the

line of the Roman road from Dorchester to Silchester (PRN 8924)(SU 5918 8398) and Roman pottery has been found along the line of this road to the south of the site (PRN 7649)(SU 5917 8378). This would suggest Roman settlement activity further into the village than was previously thought.

### **3. REQUIREMENT FOR WORK:**

- 3.1 This Archaeological Watching Brief has been required in accordance with PPG16 because of the presence of known sites of archaeological interest within the immediate vicinity of the development.
- 3.2 The requirements are for a formal programme of observation and investigation conducted during any operations on site that may disturb or destroy archaeological deposits. The programme will result in the preparation and dissemination of a report and ordered archive. Archive deposition, publication and dissemination should follow the guidelines outlined in Annexes 2, 4, 5 and 6 of the Evaluation Brief.
- 3.3 The Archaeological Watching Brief should, within the resources available, allow the preservation by record of archaeological deposits, the presence and nature of which could not be established (or established with sufficient accuracy) in advance of development or other potentially disruptive works.
- 3.4 It should provide an opportunity, if needed, for the engaged archaeological organisations to signal, before the destruction of the material in question, that an archaeological find has been made for which the resources allocated are not sufficient to support a treatment to a satisfactory and proper standard.
- 3.5 Should the Watching Brief encounter archaeological remains of sufficient significance, it will not replace any requirement for contingent excavation or the physical preservation of those remains.

### **4. SPECIFIC REQUIREMENTS:**

- 4.1 A formal programme of archaeological monitoring and recording shall be permanently maintained during any groundwork's during the development. This will include the stripping of overburden and excavation of foundation trenches or service trenches. Any archaeological deposits revealed shall be cleaned by hand and recorded in plan before being excavated and recorded at an appropriate level.

**Written Scheme of Investigation for  
an Archaeological Watching Brief**

Planning Ref. P09/W0028

**1 Introduction**

- 1.1 Planning permission has been granted by South Oxfordshire District Council for the construction of single storey side and rear extensions at the Old Vicarage, Moulsoford, Oxfordshire. Due to the possibility of below ground archaeological deposits being disturbed during the development a planning condition requiring an archaeological watching brief to be undertaken during groundworks has been attached to the permission. This is in accordance with PPG16 and the Districts Local Plan policies.
- 1.2 This Written Scheme of Investigation details how Oxford Archaeology (OA) will implement the requirements of the Oxfordshire County Archaeological Service (OCAS), as laid out in a brief prepared by the County Planning Archaeologist, Richard Oram. The first part is site specific while the appendices detail general OA standards and procedures.

**2 Geology and Topography**

- 2.1 The site is located in the centre of the village of Moulsoford, on the western side of the River Thames and is currently in use as the garden of a care home. The site lies at 50 m OD and the underlying geology is Lower Chalk (Geological Survey of England and Wales, sheet no. 254).

**3 Archaeological Background**

- 3.1 A design brief for the watching brief was prepared by Oxfordshire County Archaeological Services for this watching brief and the section on the archaeological and historical background has been reproduced for this WSI unless otherwise stated.
- 3.2 During the 1930s Roman coins were recovered from the grounds of the Old Vicarage and Roman pottery was recovered from playing fields immediately south of the application site.
- 3.3 The site is known to lie to the west of the Roman road from Dorchester to Silchester and Roman pottery has been found along the line of this road to the south of the site.

- 3.4 Cropmarks seen in fields 90 m to the west of the site show linear features and possible enclosures, and these may continue into the built-up area of the village, including the application area. A number of coffin burials, coins and pottery, all dating to the Roman period were found near to the cropmarks, as was a Bronze Age gold torc. A second gold torc was recovered 600m SW of the site.
- 3.5 A Bronze Age spear-head, now in Reading Museum, has been found within Moulsoford parish (VCH, 1923, 504).
- 3.6 Excavations 300 m SW of the site have revealed a ring ditch, pits, postholes and a linear ditch which probably relate to a Late Iron Age to Roman settlement.
- 3.7 The site lay within the old medieval manor of Moulsoford and the manor house was situated between the main road through the village and the River Thames, immediately to the east of the Old Vicarage (VCH, 1923, 504). A ferry across the River Thames, which appears to have been present during the 13th Century (VCH, 1923, 506), existed to the south of the site and would have contributed to the strategic importance of the village.

#### 4 Aims

- 4.1 To preserve by record any archaeological remains (if present) that the works may remove or damage within the area of the site being investigated.
- 4.2 To signal, before the destruction of the material in question, the discovery of a significant archaeological find, for which the resources allocated are not sufficient to support a treatment to a satisfactory and proper standard.
- 4.3 To make available the results of the investigation.

#### 5 Strategy

- 5.1 The watching brief will maintain a continuous archaeological presence during any groundwork's that may affect or reveal archaeological deposits. This will include monitoring the excavation of foundations and service trenches, surface stripping and other invasive groundworks.
- 5.2 Excavation of archaeological features will be undertaken to fulfil the basic objective of retrieval of archaeological data affected by the works. In the event that human remains are discovered, and their retrieval cannot be avoided, OA will obtain the necessary burial licence from the Ministry of Justice and remove the remains to established OA practices and with due care and respect. Wherever possible human remains will be located and planned and left in-situ.
- 5.3 All features and deposits will be issued with unique context numbers, and context recording will be in accordance with the established OA *Field Manual* (OAU 1992). All contexts, and any small finds and samples from them will be allocated unique numbers. Bulk finds will be collected by context. Colour transparency and black-and-white negative photographs will be taken of all

trenches and archaeological features.

- 5.4 Deposits deemed to be of potential environmental significance will be appropriately sampled and analysed for environmental and economic indicators.
- 5.5 Site plans will be drawn at an appropriate scale (normally 1:50 or 1:100) with larger scale plans of features as necessary. Section drawings of features and trenches will be drawn at a scale of 1:20.
- 5.6 The project will be carried out by a suitably qualified OA supervisor, under the overall direction of David Wilkinson, Senior Project Manager, and OA Head of Fieldwork, Dan Poore.
- 5.7 The watching brief will be monitored by Oxfordshire County Council Archaeological Services.

## **6 Report and Archive**

- 6.1 A client report (Appendix 8) on the results of the investigation will be completed within six weeks of the end of the fieldwork. The project supervisor and OA finds specialists will undertake the report stage under the direction of the project manager. Copies will be forwarded to the client. Three copies of the report will be submitted to the County Archaeological Service and the SMR. The report will include a copy of the completed OASIS form.
- 6.2 If environmental remains are recovered, or deposits are seen which may have the potential to contain environmental remains, then staff from the OA Environmental Department will process and scan samples of these for assessment, and arrange for detailed analysis as appropriate.
- 6.3 The County Museums Service (Oxfordshire Museums), if required, will undertake finds conservation.
- 6.4 The site archive, i.e. all finds and archaeological records (subject to the landowner's agreement) will be deposited with the County Museums Service (Oxfordshire Museums) in an approved format.

## **7 Health and Safety**

- 7.1 OA will comply with all relevant health and safety legislation.

## **8 References**

## 9 General

Appendices 7, 8 and 11 are relevant.

### OA Standard Fieldwork Methodology Appendices

---

The following methods and terms will apply, where appropriate, to all OA fieldwork unless varied by undertakings specified in a detailed Written Scheme of Investigation.

---

#### 7 WATCHING BRIEFS

- 7.1 Ground disturbances (demolition, general site strip and levelling, reduction for roads, excavation for service trenches and foundation trenches) will be monitored by an archaeological supervisor assisted, where necessary, by archaeological technicians and under the overall guidance of a project manager.
- 7.2 All archaeological features and deposits exposed will be recorded.
- 7.3 Where only the tops of features or deposits are exposed, these will be located on a site plan, planned, and recorded by written description and by photographs.
- 7.4 Visible artefacts will be collected in order to assist in the dating of features and deposits.
- 7.5 Where trenches are excavated through cut features (pits, ditches, etc.) and vertical stratigraphy is not present, the features will be recorded in section with appropriate collection of finds.
- 7.6 Where ground disturbance exposes stratified remains or significant features, these will be hand excavated by the archaeologist and recorded.
- 7.7 The archaeological curator will be advised at the earliest opportunity of any archaeological features or deposits that appear worthy of preservation *in situ*.
- 7.8 On completion of the fieldwork the site archive will be compiled and security copied.
- 7.9 Proposals for analysis and publication will be determined in the light of the results of the fieldwork.

#### RECORDING

- 7.10 All on-site recording will be undertaken in accordance with the *OA Field Manual* (ed. D Wilkinson 1992).
- 7.11 A continuous unique numbering system will be operated. Written descriptions will be recorded on proforma sheets comprising factual data and interpretative elements.

- 7.12 Plans will normally be drawn at 1:50 but in urban or deeply stratified sites a scale of 1:20 will be used. Detailed plans will be at an appropriate scale. Burials will be drawn at 1:10.
- 7.13 A register of plans will be kept.
- 7.14 Sections of features or trenches showing stratigraphy will be drawn at 1:20 or 1:10.
- 7.15 A register of sections will be kept.
- 7.16 All sections will be tied in to Ordnance Datum if possible or into the contractors TBM.
- 7.17 A black and white and colour (35 mm transparency) photographic record, illustrating in both detail and general context the principal features and finds discovered will be maintained. The photographic record will also include working shots to illustrate more generally the nature of the archaeological work.
- 7.18 Photographs will be recorded on OA Photographic Record Sheets.
- 7.19 All identified finds and artefacts from stratified archaeological deposits will be retained, although certain classes of building material or post medieval pottery may sometimes be discarded after recording if an appropriate sample is retained.

## **8 EVALUATION AND WATCHING BRIEF REPORTS**

- 8.1 Style and format of the report will be determined by OA, but will include as a minimum the following:
- A location plan of trenches and/or other fieldwork in relation to the proposed development.
  - Plans and sections of features as appropriate located at an appropriate scale.
  - A section drawing showing depth of significant deposits (if encountered) including present ground level with Ordnance Datum, vertical and horizontal scale.
  - A summary statement of the results.
  - A table summarising per trench the features, classes and numbers of artefacts contained within, spot dating of significant finds and an interpretation.
  - A reconsideration of the methodology used, and a confidence rating for the results.
  - An interpretation of the archaeological findings within both the site and their wider landscape/townscape setting.
- 8.2 Copies of the report will be supplied to the client and the Archaeological Officer monitoring the works. Copies of the report will also be supplied to the County Sites and Monuments Record on the understanding that it will become a public document after an appropriate period of time (normally six months).
- 8.3 If the evaluation works generate archaeological results of importance which merit wider publication, the client will be consulted about further arrangements.

### **ARCHIVES**

- 8.4 The site archive, including finds and environmental material, will be ordered, catalogued, labelled and conserved and stored according to the UKIC Guidelines for the preparation of excavation archives for long-term storage.
- 8.5 The site archive will be prepared to at least the minimum acceptable standard defined in Management of Archaeological Projects 2, English Heritage 1991.
- 8.6 The site archive will be microfilmed by the RCHME National Archaeological Record as a safeguard against the accidental loss and the long-term degeneration of paper records and photographs.

- 8.7 The site archive will be deposited with the relevant receiving Museum at the earliest opportunity unless further archaeological work on the site is expected within one year of completion of the archive. The OA will advise the landowner that any artefacts resulting from the project work should be given to the relevant Museum.

## 11 GENERAL

- 11.1 The requirements of the Brief will be met in full where reasonably practicable.
- 11.2 Any significant variations to the proposed methodology will be agreed with the local authority's archaeological representative in advance.
- 11.3 The scope of work detailed in the main part of the Written Scheme of Investigation is aimed at meeting the aims of the project in a cost-effective manner. Oxford Archaeology attempts to foresee possible site-specific problems and resource these. However there may be unusual circumstances which have not been included in the costing and programme.
- Unavoidable delays due to extreme bad weather, vandalism, etc.
  - Complex structures or objects, including those in waterlogged conditions, requiring specialist removal.
  - Extensions to specified trenches or feature sample sizes requested by the archaeological curator.
  - Trenches requiring shoring or stepping, ground contamination, unknown services, poor ground conditions requiring additional plant, specialist reinstatement of surfaces (i.e. tarmac, turf).

### HEALTH AND SAFETY and INSURANCE

- 11.4 All work will be carried out to the requirements of *Health and Safety at Work, etc. Act 1974*, *The Management of Health and Safety Regulations 1999*, the OA Health and Safety Policy and Procedures Manual, and any main contractor's requirements.
- 11.5 A copy of the OA's Health and Safety Policy is available on request. OA will require copies of the H & S policies of all other contractors and operators present on site in compliance with *The Manual of H & S Regulations 1992*.
- 11.6 The OA holds Employers Liability Insurance, Public Liability Insurance and Professional Indemnity Insurance. Details will be supplied on request.
- 11.7 The OA will not be liable to indemnify the client against any compensation or damages for or with respect to:
- Damage to crops being on the Area or Areas of Work (save in so far as possession has not been given to the Archaeological Contractor);
  - The use or occupation of land (which has been provided by the Client) by the Project or for the purposes of completing the Project (including consequent loss of crops). Interference whether temporary or permanent with any right of way, light, air or water or other easement or quasi easement which are the unavoidable result of the Project in accordance with the Agreement;
  - Any other damage which is the unavoidable result of the Project in accordance with the Agreement;
  - Injuries or damage to persons or property resulting from any act or neglect or breach of statutory duty done or committed by the client or his agents, servants or their contractors (not being employed by Oxford Archaeology) or for or in respect of any claims demands proceedings damages costs charges and expenses in respect thereof or in relation thereto.

### COPYRIGHT and CONFIDENTIALITY

- 11.8 Oxford Archaeology will retain full copyright of any commissioned reports, tender documents or other project documents, under the Copyright, Designs and Patents Act 1988 with all rights reserved; excepting that it will provide an exclusive licence to the client in all matters directly relating to the project as described in the Written Scheme of Investigation.
- 11.9 Oxford Archaeology will assign copyright to the client upon written request but retains the right to be identified as the author of all project documentation and reports as defined in the Copyright, Designs and Patents Act 1988 (Chapter IV, s.79).
- 11.10 OA will advise the client of any such materials supplied in the course of projects that are not OA's copyright.
- 11.11 OA undertakes to respect all requirements for confidentiality about the client's proposals provided that these are clearly stated. It is expected that such conditions shall not unreasonably impede the satisfactory performance of the services required. OA further undertake to keep confidential any conclusions about the likely implications of such proposals for the historic environment. It is expected that clients respect OA's general ethical obligations not to suppress significant archaeological data for an unreasonable period.

#### OA STANDARDS AND PROCEDURES

- 11.12 OA shall conform to the standards of professional conduct outlined in the Institute of Field Archaeologists' Code of Conduct, the IFA Code of Approved Practice for the Regulation of Contractual Arrangements in Field Archaeology, the IFA Standards and Guidance for Field Evaluations, Desk Based Assessments, etc. and the British Archaeologists and Developers Liaison Group Code of Practice.
- 11.13 OA is a member of the Institute of Environmental Assessment and the Council for British Archaeology.
- 11.14 Project Directors normally will be recognised in an appropriate Area of Competence by the IFA. For more extensive and complicated evaluation projects especially where they are part of large-scale programmes of work in historic urban centres, the procedures outlined in English Heritage's *Management of Archaeological Projects* 2nd Edition 1991 (MAP 2) will be followed for immediate post-field archive preparation and initial assessment. Agreement to then be reached, in collaboration with the local authority's archaeological representative, about what aspects will need to be taken forward to provide a report in the required format containing the information needed for planning purposes.

### Project details

Project name	Old Vicarage Moulsoford
Short description of the project	Oxford Archaeology carried out an archaeological watching brief at the Old Vicarage, Moulsoford, Oxfordshire (NGR SU 589 839). The work was commissioned in response to a planning condition imposed by South Oxfordshire District Council. The watching brief revealed topsoil overlying modern demolition deposits. The demolition deposits were probably laid down to level off and landscape the gardens surrounding the care home on completion of the construction of the existing extensions. No archaeological deposits or features were encountered during the course of the watching brief.
Project dates	Start: 04-11-2009 End: 02-12-2009
Previous/future work	No / Not known
Any associated project reference codes	MOUOV09 - Sitecode
Any associated project reference codes	OXCMS:2009.87 - Museum accession ID
Type of project	Recording project
Current Land use	Other 5 - Garden
Monument type	NA None
Significant Finds	NA None
Investigation type	'Watching Brief'
Prompt	Planning condition

## COMMENTS

Arrived site 08.00

PB Builders arrive 08.50 (traffic).

Start reducing ground level at western end/rear of Cave home - 18m x 10m trench. Reduced area by approx 0.5m from ground surface, through 0.15m of topsoil and into whole ground which consisted of broken brick, tile, concrete, metal + plastic.

Drains also situated within the reduction area.

- There are also plans to reduce an area at the north end of the Cave home for a 6m x 6m Conservatory/extension

- Machinery used = 1 x JCB Site Master 3cx with a 0.87m wide ditching bucket and 1 x small dumper/tipper.

St PB Builders left site at 14.00

Returned to OA.

### COMMENTS

ARRIVED ON SITE @ 08:27 hrs. PB BUILDERS ARRIVED @ 10:04 hrs. MADE CONTACT WITH FOREMAN BOB PRICE. CONTINUATION OF GROUND REDUCTION COMPLETED @ 11:00 hrs. FURTHER "MADE GROUND" REVEALED WITHIN TRENCH. WORK STOPPED @ 11:30 hrs FOR REPAIRS TO JCB.

WORK ON FOOTINGS BEGAN @ 11:45 hrs, EXCAVATION BY MINI DIGGER. WORK STOPPED @ 12:30 hrs DUE TO LARGE CONCRETE FOOTING BEING IN THE WAY. BROKE FOR LUNCH @ 13:00 hrs.

RESUMED FOOTING EXCAVATION. @ 13:45 hrs. MORE DISTURBED GROUND OBSERVED. WORKMAN STOPPED @ 15:30 hrs.

LEFT SITE @ 16:00 hrs.

THE CONCRETE IS VISIBLE WITHIN THE FOOTING TRENCH AT THE EAST OF THE EXCAVATION AREA. THE CONCRETE IS @ 750mm DEEP AND IS APPROX 300mm THICK. IT COVERS AN AREA APPROX 3x4m IN THIS EASTERN END OF TRENCH. IT SEEMS TO BE FOOTING FOR A MODERN STRUCTURE AS FROGGED BRICKS PRESENT.

## COMMENTS

Arrived site 08.00 - PB Builders on site.

Spoke to Bob Price of PB Builders - plan to reduce area 2 to north of Care Home - they had already excavated footings trench - what appeared to be a pit was visible in section, however it was seen to contain modern building debris. (Possibly related to previous buildings)

- 11.00 started to reduce Area 2 - did not fully reach natural - dug into subsoil (102) - Could not see anything in plan - ~~section~~ possible pit seen earlier on a section of ~~service~~ <sup>footings</sup> trench not reached/seen in plan.

Reduction interrupted by Builders damaging + replacing plastic drainage pipes.

Started to rain heavily towards end of day, but reduction had been completed by then.

Spoke to Bob Price at end of day - no more ground reductions planned.

STRATIGRAPHIC MATRIX

① Loose

② White, brown, grey

③ Silt, Mortar

④ 40-50% bricks/demolition rubble + pieces of concrete + metal

⑤ -

⑥

⑧ Machine

Interpretation/Discussion:

Layer of demolition rubble - comprises of silt + mortar with a substantial amount of modern bricks/demolition rubble - bricks are frosted and are 21 x 11 x 7 cm.

Could be remains of old from older buildings - used to build up/landscape gardens of Cave here.
