## 05/01912/F – land Adj. And East of 2 Park Lane, North Newington

### **Design Brief for Archaeological Watching Brief**

Sp 420 398

#### **1. SUMMARY OF BRIEF:**

- 1.1 This brief provides the outline framework on which a detailed specification of work should be based. It is advisable that archaeological organisations forward the specification to the County Archaeological Officer or his representative for validation before submitting costed proposals to the agency commissioning the Watching Brief.
- 1.2 A formal programme of archaeological observation and investigation shall be conducted during any operations on site that may disturb or destroy archaeological deposits. Significant features to be hand cleaned and sample excavated.

#### **2. BACKGROUND:**

##### **2.1 Site Location and Description**

- 2.1.1 The 307 square metre site is located close to the junction of, and lying between, School lane to the north and Park Lane to the south. The existing use of the plot is a garden with a garage at its north end. The site is situated at between 121.5 and 124.5 metres above OD, sloping from south to north. The underlying geology is Middle Lias clays and silts.

##### **2.2 Planning Background**

- 2.2.1 Cherwell District Council has granted planning permission under planning number 05/01912/F for the demolition of the existing garage and the erection of a single detached house with garage. Cherwell District Council has attached a condition requiring the implementation of an archaeological watching brief in accordance with PPG16 and Cherwell Local Plan policies.

##### **2.3 Archaeological Background**

- 2.3.1 The site lies within the medieval core of North Newington as indicated by an archaeological watching brief carried out at Willow Bank, School Lane in 2003. This produced evidence of a 12<sup>th</sup> –14<sup>th</sup> century rubbish pit, 14<sup>th</sup> –15<sup>th</sup> century pottery, and a probable medieval wall foundation on the frontage of School Lane.

#### **3. REQUIREMENT FOR WORK:**

- 3.1 This Archaeological Watching Brief has been required in accordance with PPG16 because of the presence of known sites of archaeological interest within the immediate vicinity of the development.
- 3.2 The requirements are for a formal programme of observation and investigation conducted during any operations on site that may disturb or destroy archaeological deposits. The programme will result in the preparation and dissemination of a

report and ordered archive. Archive deposition, publication and dissemination should follow the guidelines outlined in Annexes 2, 4, 5 and 6 of the Evaluation Brief.

- 3.3 The Archaeological Watching Brief should, within the resources available, allow the preservation by record of archaeological deposits, the presence and nature of which could not be established (or established with sufficient accuracy) in advance of development or other potentially disruptive works.
- 3.4 It should provide an opportunity, if needed, for the engaged archaeological organisations to signal, before the destruction of the material in question, that an archaeological find has been made for which the resources allocated are not sufficient to support a treatment to a satisfactory and proper standard.
- 3.5 Should the Watching Brief encounter archaeological remains of sufficient significance, it will not replace any requirement for contingent excavation or the physical preservation of those remains.

#### **4. SPECIFIC REQUIREMENTS:**

- 4.1 A formal monitoring and recording programme will be maintained during the main groundwork operations. The watching brief will concentrate on the excavation of foundation trenches and service trenches.

## **ANNEX 2**

### **MONITORING ARRANGEMENTS:**

Oxfordshire County Council Archaeological Services (Directorate Environment & Economy) will monitor progress and standards throughout the project. To facilitate this, the project design should include a projected timetable on site (indicating staff grades, members and machine hire time if appropriate etc). The County Archaeological Officer shall be notified of the start date at least two weeks prior to commencing of work.

## **ANNEX 4**

### **ARCHIVE DEPOSITION:**

1. The archive should be prepared to the minimum acceptable standard defined in MAP2 (5.4 and Appendix 3). The integrity of the archive should be maintained.
2. The contracted archaeological organisation will endeavour to ensure that the full integrated site archive including all finds (other than gold and silver declared by a Coroner's Inquest to be Treasure under the current Treasure Act) shall, with the agreement of the owners, be deposited after completion of post-excavation work with the County Museums Service (Oxfordshire Museums) unless another repository is indicated.
3. Oxfordshire Museums requires that deposited archives from developer-led archaeological work shall be accompanied by funding equivalent to the current HBMC Box Storage Grant. Archaeological organisations shall therefore include an estimate of the costs of deposition for this project in their tender. The estimated cost will be clearly shown and shall be calculated in accordance with the procedures set out in "Charge for Archaeological Archives Deposited with Oxfordshire Museums" *Oxfordshire Museums 1995*.
4. In the event of the legal owner(s) resolving to retain all or part of the site archive, they shall be responsible for the future preservation and maintenance of any material element of that archive. That part of the site archive in question, shall be transferred to the legal owner only after; all necessary processing, research, analysis and investigative/stabilising conservation and correct packing necessary to prepare the archive for preservation and storage in a usable, accessible form, and to produce a full report for publication, has been completed. The owner shall ensure that all necessary provision is made for the long-term preservation of the archive in a satisfactory environment, and that it is accessible for future research. The contracted archaeological organisation will ensure that a proper record of material kept by the landowner shall be included in the written archive, and the location and ownership of the material shall be stated in the written archive and public record. The explicit (written) permission of the owner shall be obtained for the latter in order that the *Data Protection Act 1984* is not contravened.
5. A summary report and details of archive deposition shall be submitted to the County SMR and NMR, and a limited selection of representative photographic slides from the site archive shall be duplicated and deposited with the SMR.
6. The County Museums Service shall be notified in advance, of the expected time limits for deposition of the archive.

## **ANNEX 5**

### **PUBLICATION AND DISSEMINATION:**

1. Two copies of the summary report shall be supplied to the office of the County Archaeological Officer; one for verification and assessment by the CAO or his representative; the second to be lodged with the County Sites and Monuments Record on the understanding that it will become a public document after an appropriate period of time (generally not exceeding six months).
2. All archaeological organisations should ensure that an abstract containing the essential elements of the results precedes the main body of the report.
3. Publication of the results (even if limited to one line reports on work done with negative results) should be pursued, and should take place within a reasonable length of time (normally not more than five years after completion of the work). Style and format to be determined by the archaeological organisation, with regard to agreed standards of archaeological publication, and the house style of the appropriate local, regional or national publication.
4. The report should state the location of the archive and acknowledge the curatorial role played in the project by Oxfordshire County Council Archaeological Services. It should also acknowledge any provision of information from the County Sites and Monuments Record which is copyright of Oxfordshire County Council. Any secondary reports or articles generated by this project shall similarly acknowledge County Archaeological Services and the SMR.
5. With regard to publication; the level of the report should take into account the scale of the evaluation, the overall importance of the site based on English Heritage characterisation criteria, and its status within local and regional research strategies. We would suggest that, unless evidence of national or special local significance is revealed, a summary report conforming to the minimum requirements defined in MAP2 Appendix 7.1, should be produced for publication.

**Land Adjacent 2 Park Lane, North Newington,  
Oxfordshire**

NGR: SP 420 398

**Written Scheme of Investigation for  
an Archaeological Watching Brief**

Planning Reference: 05/01912/F

**1 Introduction**

- 1.1 Planning permission was sought from Cherwell District Council in 2005 for the demolition of an existing garage and the erection of a single detached house with garage (05/01912/F).
- 1.2 Due to the potential disturbance of archaeological deposits during the development a condition has been attached requiring that an archaeological watching brief be undertaken during all groundworks. This is in line with PPG 16 and the Cherwell District Local Plan.
- 1.3 Paul Smith, the County Archaeologist representing Oxfordshire County Council has prepared a *Design Brief for an Archaeological Watching Brief* (from here referred to as the *Brief*). The *brief* sets out the requirements and standards for the archaeological work.
- 1.4 This Written Scheme of Investigation (WSI) details how Oxford Archaeology (OA) would implement the requirements of the *brief*. The first part is site specific while the Appendices detail general OA standards and procedures.

**2 Geology and Topography**

- 2.1 The site is located close to the junction of, and lying between, School Lane to the north and Park Lane to the south. The site measures 307 square metres and is currently in use as a garage and a garden. The site lies between 121.5 and 124.5 metres above OD, sloping from the south to the north. The underlying geology is Middle Lias clays and silts.

**3 Archaeological Background**

- 3.1 The proposed development site lies within the medieval core of North Newington as indicated by an archaeological watching brief carried out at Willow Bank, School Lane in 2003. This produced evidence of a 12th - 14th century rubbish pit, 14th - 15th century pottery, and a probable medieval wall foundation on the frontage of School Lane.

## 4 Aims

- 4.1 To preserve by record any archaeological remains (if present) that the works may remove or damage within the area of site being investigated. In particular any topsoil stripping, levelling, creation of access routes, excavation of foundation and service trenching.
- 4.2 To signal, before the destruction of the material in question, the discovery of a significant archaeological find, for which the resources allocated are not sufficient to support a treatment to a satisfactory and proper standard.
- 4.3 To make available the results of the investigation.

## 5 Strategy

- 5.1 The watching brief will be maintained during the period of ground works that may affect or reveal archaeological deposits.
- 5.2 Excavation of archaeological features will be undertaken to fulfil the basic objective of retrieval of archaeological data affected by the works. In the event that Human remains are discovered, and their retrieval cannot be avoided, OA will obtain the necessary burial licence from the Home Office and remove the remains to established OA practises and with due care and respect. Wherever possible human remains will be located and planned and left *in-situ*.
- 5.3 In the event of significant archaeological remains being discovered, for which the resources allocated are not sufficient to support a treatment to a satisfactory and proper standard, all groundworks with the potential to effect this archaeology will be halted until a suitable mitigation strategy has been agreed with the County Archaeologist and implemented by the attending Archaeologist(s).
- 5.4 The main contractor on site will allow sufficient time and working space for the attending Archaeologist(s) to carry out any agreed mitigation procedures requested by the County Archaeologist. Depending on the nature and significance of these remains, recording to full excavation standards may be necessary, but will be undertaken in such a way as to minimise any delays the main contractor's work program.
- 5.5 All features and deposits will be issued with unique context numbers, and context recording will be in accordance with the established OA *Field Manual* (OAU 1992). All contexts, and any small finds and samples from them will be allocated unique numbers. Bulk finds will be collected by context. Colour transparency and black-and-white negative photographs will be taken of all trenches and archaeological features.
- 5.6 Provision will be made for taking environmental/organic samples in accordance with OA Environmental procedures (OA 2000).

- 5.7 Site plans will be drawn at an appropriate scale (normally 1:50 or 1:100) with larger scale plans of features as necessary. Section drawings of features and sample sections of trenches will be drawn at a scale of 1:20. Full trench sections will be drawn only if complex stratigraphy is present.
- 5.8 The project will be carried out by a suitably qualified OA supervisor, under the direction of Dan Dodds, Project Manager and overall direction of Nick Shepherd, OA Head of Fieldwork.
- 5.9 The watching brief will be monitored by Oxfordshire County Council Archaeological Services.

## **6 Report and Archive**

- 6.1 A client report (appendix 8) on the results of the investigation will be completed within three weeks of the end of the fieldwork. The project supervisor and OA finds specialists will undertake the report stage under the direction of the project manager. Copies will be forwarded to the client. Two copies of the report will be submitted to the County Archaeological Service and the SMR.
- 6.2 If environmental remains are recovered, then the staff from the OA Environmental Department will scan these to assess the potential of the remains. Detailed analysis, if required, would normally be undertaken by the University Museum, Oxford.
- 6.3 The County Museums Service (Oxfordshire Museums), if required, will undertake finds conservation.
- 6.4 The site archive including finds (subject to the landowner's agreement) will be deposited with the County Museums Service (Oxfordshire Museums) in an approved format.

## **7 Health and Safety**

- 7.1 OA will comply with all relevant health and safety legislation.

## **8 General**

- 8.1 Appendix 7, 8 and 11 are relevant to this project.

## **9 Bibliography and References**

IFA, 2001 *Standard and Guidance for Archaeological Watching Briefs*

OA, 2000 *OA Environmental Guidelines for sampling*

OAU, 1992 *Field Manual* (ed. Wilkinson D)

---

## OA Standard Fieldwork Methodology Appendices

---

The following methods and terms will apply, where appropriate, to all OA fieldwork unless varied by undertakings specified in a detailed Written Scheme of Investigation.

---

### 7 WATCHING BRIEFS

- 7.1 Ground disturbances (demolition, general site strip and levelling, reduction for roads, excavation for service trenches and foundation trenches) will be monitored by an archaeological supervisor assisted, where necessary, by archaeological technicians and under the overall guidance of a project manager.
- 7.2 All archaeological features and deposits exposed will be recorded.
- 7.3 Where only the tops of features or deposits are exposed, these will be located on a site plan, planned, and recorded by written description and by photographs.
- 7.4 Visible artefacts will be collected in order to assist in the dating of features and deposits.
- 7.5 Where trenches are excavated through cut features (pits, ditches, etc.) and vertical stratigraphy is not present, the features will be recorded in section with appropriate collection of finds.
- 7.6 Where ground disturbance exposes stratified remains or significant features, these will be hand excavated by the archaeologist and recorded.
- 7.7 The archaeological curator will be advised at the earliest opportunity of any archaeological features or deposits that appear worthy of preservation *in situ*.
- 7.8 On completion of the fieldwork the site archive will be compiled and security copied.
- 7.9 Proposals for analysis and publication will be determined in the light of the results of the fieldwork.

### RECORDING

- 7.10 All on-site recording will be undertaken in accordance with the *OA Field Manual* (ed. D Wilkinson 1992).
- 7.11 A continuous unique numbering system will be operated. Written descriptions will be recorded on proforma sheets comprising factual data and interpretative elements.
- 7.12 Plans will normally be drawn at 1:50 but in urban or deeply stratified sites a scale of 1:20 will be used. Detailed plans will be at an appropriate scale. Burials will be drawn at 1:10.
- 7.13 A register of plans will be kept.
- 7.14 Sections of features or trenches showing stratigraphy will be drawn at 1:20 or 1:10.
- 7.15 A register of sections will be kept.
- 7.16 All sections will be tied in to Ordnance Datum if possible or into the contractors TBM.
- 7.17 A black and white and colour (35 mm transparency) photographic record, illustrating in both detail and general context the principal features and finds discovered will be maintained. The

photographic record will also include working shots to illustrate more generally the nature of the archaeological work.

7.18 Photographs will be recorded on OA Photographic Record Sheets.

7.19 All identified finds and artefacts from stratified archaeological deposits will be retained, although certain classes of building material or post medieval pottery may sometimes be discarded after recording if an appropriate sample is retained.

## **8 EVALUATION AND WATCHING BRIEF REPORTS**

8.1 Style and format of the report will be determined by OA, but will include as a minimum the following:

- A location plan of trenches and/or other fieldwork in relation to the proposed development.
- Plans and sections of features as appropriate located at an appropriate scale.
- A section drawing showing depth of significant deposits (if encountered) including present ground level with Ordnance Datum, vertical and horizontal scale.
- A summary statement of the results.
- A table summarising per trench the features, classes and numbers of artefacts contained within, spot dating of significant finds and an interpretation.
- A reconsideration of the methodology used, and a confidence rating for the results.
- An interpretation of the archaeological findings within both the site and their wider landscape/townscape setting.

8.2 Copies of the report will be supplied to the client and the Archaeological Officer monitoring the works. Copies of the report will also be supplied to the County Sites and Monuments Record on the understanding that it will become a public document after an appropriate period of time (normally six months).

8.3 If the evaluation works generate archaeological results of importance which merit wider publication, the client will be consulted about further arrangements.

### **ARCHIVES**

8.4 The site archive, including finds and environmental material, will be ordered, catalogued, labelled and conserved and stored according to the UKIC Guidelines for the preparation of excavation archives for long-term storage.

8.5 The site archive will be prepared to at least the minimum acceptable standard defined in Management of Archaeological Projects 2, English Heritage 1991.

8.6 The site archive will be microfilmed by the RCHME National Archaeological Record as a safeguard against the accidental loss and the long-term degeneration of paper records and photographs.

8.7 The site archive will be deposited with the relevant receiving Museum at the earliest opportunity unless further archaeological work on the site is expected within one year of completion of the archive. The OA will advise the landowner that any artefacts resulting from the project work should be given to the relevant Museum.

## **11 GENERAL**

11.1 The requirements of the Brief will be met in full where reasonably practicable.

11.2 Any significant variations to the proposed methodology will be agreed with the local authority's archaeological representative in advance.

- 11.3 The scope of work detailed in the main part of the Written Scheme of Investigation is aimed at meeting the aims of the project in a cost-effective manner. Oxford Archaeology attempts to foresee possible site-specific problems and resource these. However there may be unusual circumstances which have not been included in the costing and programme.

- Unavoidable delays due to extreme bad weather, vandalism, etc.
- Complex structures or objects, including those in waterlogged conditions, requiring specialist removal.
- Extensions to specified trenches or feature sample sizes requested by the archaeological curator.
- Trenches requiring shoring or stepping, ground contamination, unknown services, poor ground conditions requiring additional plant, specialist reinstatement of surfaces (i.e. tarmac, turf).

#### HEALTH AND SAFETY and INSURANCE

- 11.4 All work will be carried out to the requirements of *Health and Safety at Work, etc. Act 1974*, *The Management of Health and Safety Regulations 1992*, the SCAUM (Standing Conference of Archaeological Unit Managers) H & S manual *Health and Safety in Field Archaeology 1991*, the OA Health and Safety Policy, and any main contractors requirements.
- 11.5 A copy of the OA's Health and Safety Policy is available on request. OA will require copies of the H & S policies of all other contractors and operators present on site in compliance with *The Manual of H & S Regulations 1992*.
- 11.6 The OA holds Employers Liability Insurance, Public Liability Insurance and Professional Indemnity Insurance. Details will be supplied on request.
- 11.7 The OA will not be liable to indemnify the client against any compensation or damages for or with respect to:
- Damage to crops being on the Area or Areas of Work (save in so far as possession has not been given to the Archaeological Contractor);
  - The use or occupation of land (which has been provided by the Client) by the Project or for the purposes of completing the Project (including consequent loss of crops). Interference whether temporary or permanent with any right of way, light, air or water or other easement or quasi easement which are the unavoidable result of the Project in accordance with the Agreement;
  - Any other damage which is the unavoidable result of the Project in accordance with the Agreement;
  - Injuries or damage to persons or property resulting from any act or neglect or breach of statutory duty done or committed by the client or his agents, servants or their contractors (not being employed by Oxford Archaeology) or for or in respect of any claims demands proceedings damages costs charges and expenses in respect thereof or in relation thereto.

#### COPYRIGHT and CONFIDENTIALITY

- 11.8 Oxford Archaeology will retain full copyright of any commissioned reports, tender documents or other project documents, under the Copyright, Designs and Patents Act 1988 with all rights reserved; excepting that it will provide an exclusive licence to the client in all matters directly relating to the project as described in the Written Scheme of Investigation.
- 11.9 Oxford Archaeology will assign copyright to the client upon written request but retains the right to be identified as the author of all project documentation and reports as defined in the Copyright, Designs and Patents Act 1988 (Chapter IV, s.79).
- 11.10 OA will advise the client of any such materials supplied in the course of projects that are not OA's copyright.

- 11.11 OA undertakes to respect all requirements for confidentiality about the client's proposals provided that these are clearly stated. It is expected that such conditions shall not unreasonably impede the satisfactory performance of the services required. OA further undertake to keep confidential any conclusions about the likely implications of such proposals for the historic environment. It is expected that clients respect OA's general ethical obligations not to suppress significant archaeological data for an unreasonable period.

#### OA STANDARDS AND PROCEDURES

- 11.12 OA shall conform to the standards of professional conduct outlined in the Institute of Field Archaeologists' Code of Conduct, the IFA Code of Approved Practice for the Regulation of Contractual Arrangements in Field Archaeology, the IFA Standards and Guidance for Field Evaluations, Desk Based Assessments, etc. and the British Archaeologists and Developers Liaison Group Code of Practice.
- 11.13 OA is a member of the Institute of Environmental Assessment and the Council for British Archaeology.
- 11.14 Project Directors normally will be recognised by the IFA as MIFA grade or equivalent. For more extensive and complicated evaluation projects especially where they are part of large-scale programmes of work in historic urban centres, the procedures outlined in English Heritage's *Management of Archaeological Projects* 2nd Edition 1991 (MAP 2) will be followed for immediate post-field archive preparation and initial assessment. Agreement to then be reached, in collaboration with the local authority's archaeological representative, about what aspects will need to be taken forward to provide a report in the required format containing the information needed for planning purposes.

## SUMMARY

*In July 2006 Oxford Archaeology (OA) carried out an archaeological watching brief on land adjacent to 2 Park Lane, North Newington, Oxfordshire (NGR: SP 420 398). The work was commissioned by Johnson Controls Inc in advance of the demolition of a garage and construction of a single new detached house and garage. The watching brief revealed a stone wall, possibly part of an earlier boundary wall and a second, later, stone wall subdividing the plot.*

## 1 INTRODUCTION

### 1.1 Scope of work

- 1.1.1 In July 2006, Oxford Archaeology (OA) carried out an archaeological watching brief at The Old School, Shenington, Oxfordshire (NGR: SP 420 398). The work was commissioned by Johnson Controls Inc in respect of a planning application for the demolition of an existing garage and the erection of a single detached house with garage (Planning Application No. 05/01912/F). Due to the potential for disturbance of archaeological deposits, a condition requiring an archaeological watching brief be undertaken during the period of groundworks was attached to the planning permission.
- 1.1.2 A project brief was set by Paul Smith, the County Archaeologist representing Oxfordshire County Council detailing these requirements (OCAS, 2005).
- 1.1.3 OA prepared a Written Scheme of Investigation detailing how it would meet the requirements of the brief (OA, 2005).

### 1.2 Location, geology and topography

- 1.2.1 The village of North Newington is located approximately 2 km west of Banbury. The development area is located close to the junction of, and lying between, School Lane to the north and Park Lane to the south. The site measures 307 square metres and is currently in use as a garage and a garden. The site lies between 121.5 m and 124.5 m above OD, sloping from the south to the north. The underlying geology is Middle Lias clays and silts (Geological Survey of Great Britain, sheet no 201).

### 1.3 Archaeological and historical background

- 1.3.1 The archaeological background to the watching brief was prepared for the WSI for the project (OA 2006) and is reproduced below.
- 1.3.2 The proposed development site lies within the medieval core of North Newington. Evidence to support this was indicated by an archaeological watching brief carried out at Willow Bank, School Lane in 2003. This produced evidence of a 12th - 14th

century rubbish pit, 14th - 15th century pottery, and a probable medieval wall foundation on the frontage of School Lane.

## 2 PROJECT AIMS AND METHODOLOGY

### 2.1 Aims

- 2.1.1 To identify and record the presence or absence, extent, condition, quality, character and date of archaeological remains in the areas affected by the development.
- 2.1.2 To preserve by record any archaeological remains which the groundworks will remove or damage within the development area.
- 2.1.3 To make available the results of the archaeological investigation.

### 2.2 Methodology

- 2.2.1 The watching brief consisted of two visits to the site to monitor the progress and extent of the excavations and to record any remains exposed during the works.
- 2.2.2 These works consisted of the machine excavation of engineering trial pits, the removal of modern foundations and ground reduction.
- 2.2.3 A plan showing the extent and location of the excavations was maintained at a scale of 1:100 (Fig. 2) and where excavated their sections drawn at scales of 1:20 (Fig.3). All excavations and sections were photographed using colour slide and black and white print film. A general photographic record of the work was also made. Recording followed procedures detailed in the *OA Field Manual* (ed D Wilkinson, 1992).

## 3 RESULTS

### 3.1 Description of deposits

- 3.1.1 Prior to the excavation of the foundations an overall topsoil strip was conducted over the development area removing approximately 0.25 m depth of dark brown silty clay loam.
- 3.1.2 As part of the new construction foundations for a new retaining wall were dug along the southern edge and part way up the eastern side of the plot. This trench measured 0.8 m wide and was excavated to a maximum depth of 2.3 m.
- 3.1.3 During the excavation of the trench along the southern edge of the plot the underlying natural, a light grey clay (5) was encountered at a depth of between 0.9 m and 1.25 m below the original ground level (Fig. 3, Sections 1, 2 and 3).

- 3.1.4 Along the southern and eastern sides of the trench this was overlaid by a 0.2 m deep layer of dark grey silt clay (4) (Section 2 and 3). This possibly represents a buried soil horizon.
- 3.1.5 This layer was cut by a robber trench or possible construction cut, (7) (Fig. 2, Site plan, Sections 1 and 3). This ran parallel to the eastern boundary of the site, and returned along the southern boundary for approximately 3.5 m before terminating. The full width of this feature was not exposed in the foundation trench. The feature was filled by loose stone rubble in a clay silt matrix (6), the probable remnants from robbing out the feature.
- 3.1.6 Sealing 6 and 7 was a layer of light brown sandy silt containing angular fragments of sandstone (3). This deposit measured up to 0.75 m in depth, with the thickness decreasing towards the north and east.
- 3.1.7 Cutting this deposit was a north-south running construction cut (8) measuring 1.1 m wide and 0.4 m deep (Section 1). This appears to respect the alignment of the earlier wall represented by Cut 7. Constructed within this trench was a roughly built sandstone wall (1). The majority of the stones were very roughly dressed although occasionally faced stone was observed. This wall had been truncated down to the level of layer 3.
- 3.1.8 Sealing wall 1 and layer 3 was a layer of grey-brown sandy loam (2) (Sections 2 and 3).

### 3.2 Finds

- 3.2.1 Finds recovered from the surface of Layer 2 consisted of late post-medieval tile and pieces of broken brick. These were recorded and evaluated on site, but not retained. No other dating evidence was recovered.

### 3.3 Palaeo-environmental remains

- 3.3.1. No deposits suitable for paleo-environmental sampling were encountered during the watching brief

## 4 DISCUSSION AND CONCLUSIONS

- 4.1.1 The watching brief encountered a buried soil horizon (4). This probably represents a layer of worked soil. No dating evidence was recovered but it may predate the construction of No 2 Park Lane.
- 4.1.2 Cut 7 and its fill 6 represents the truncated remnants of an earlier boundary/retaining wall running round the south-eastern corner of the plot. The current plot boundaries appear to have been built outside this wall and the wall robbed out, suggesting that the earlier wall may also predate the construction of No. 2.

- 4.1.3 Layer 3 is a probable layer of made ground. No dating evidence was recovered to suggest that this is associated with the construction of No 2. Wall 1 may have been a boundary wall subdividing the plot which was demolished/truncated subsequent to the construction of No.2.
- 4.1.4 Layer 2 is a probable layer of worked soil possibly indicative of a garden soil.
- 4.1.5 No residual dating evidence or truncated medieval features were observed during the course of the watching brief.

## APPENDICES

## APPENDIX 1 ARCHAEOLOGICAL CONTEXT INVENTORY

<i>Context</i>	<i>Type</i>	<i>Depth</i>	<i>Width</i>	<i>Comments</i>	<i>Finds</i>	<i>Date</i>
1	Structure			Truncated base of a north-south running stone wall	-	-

## APPENDIX 3 SUMMARY OF SITE DETAILS

**Site name:** Land adjacent to 2 Park Lane, North Newington, Oxfordshire

**Site code:** NONPL 06

**Grid reference:** SP 420 398

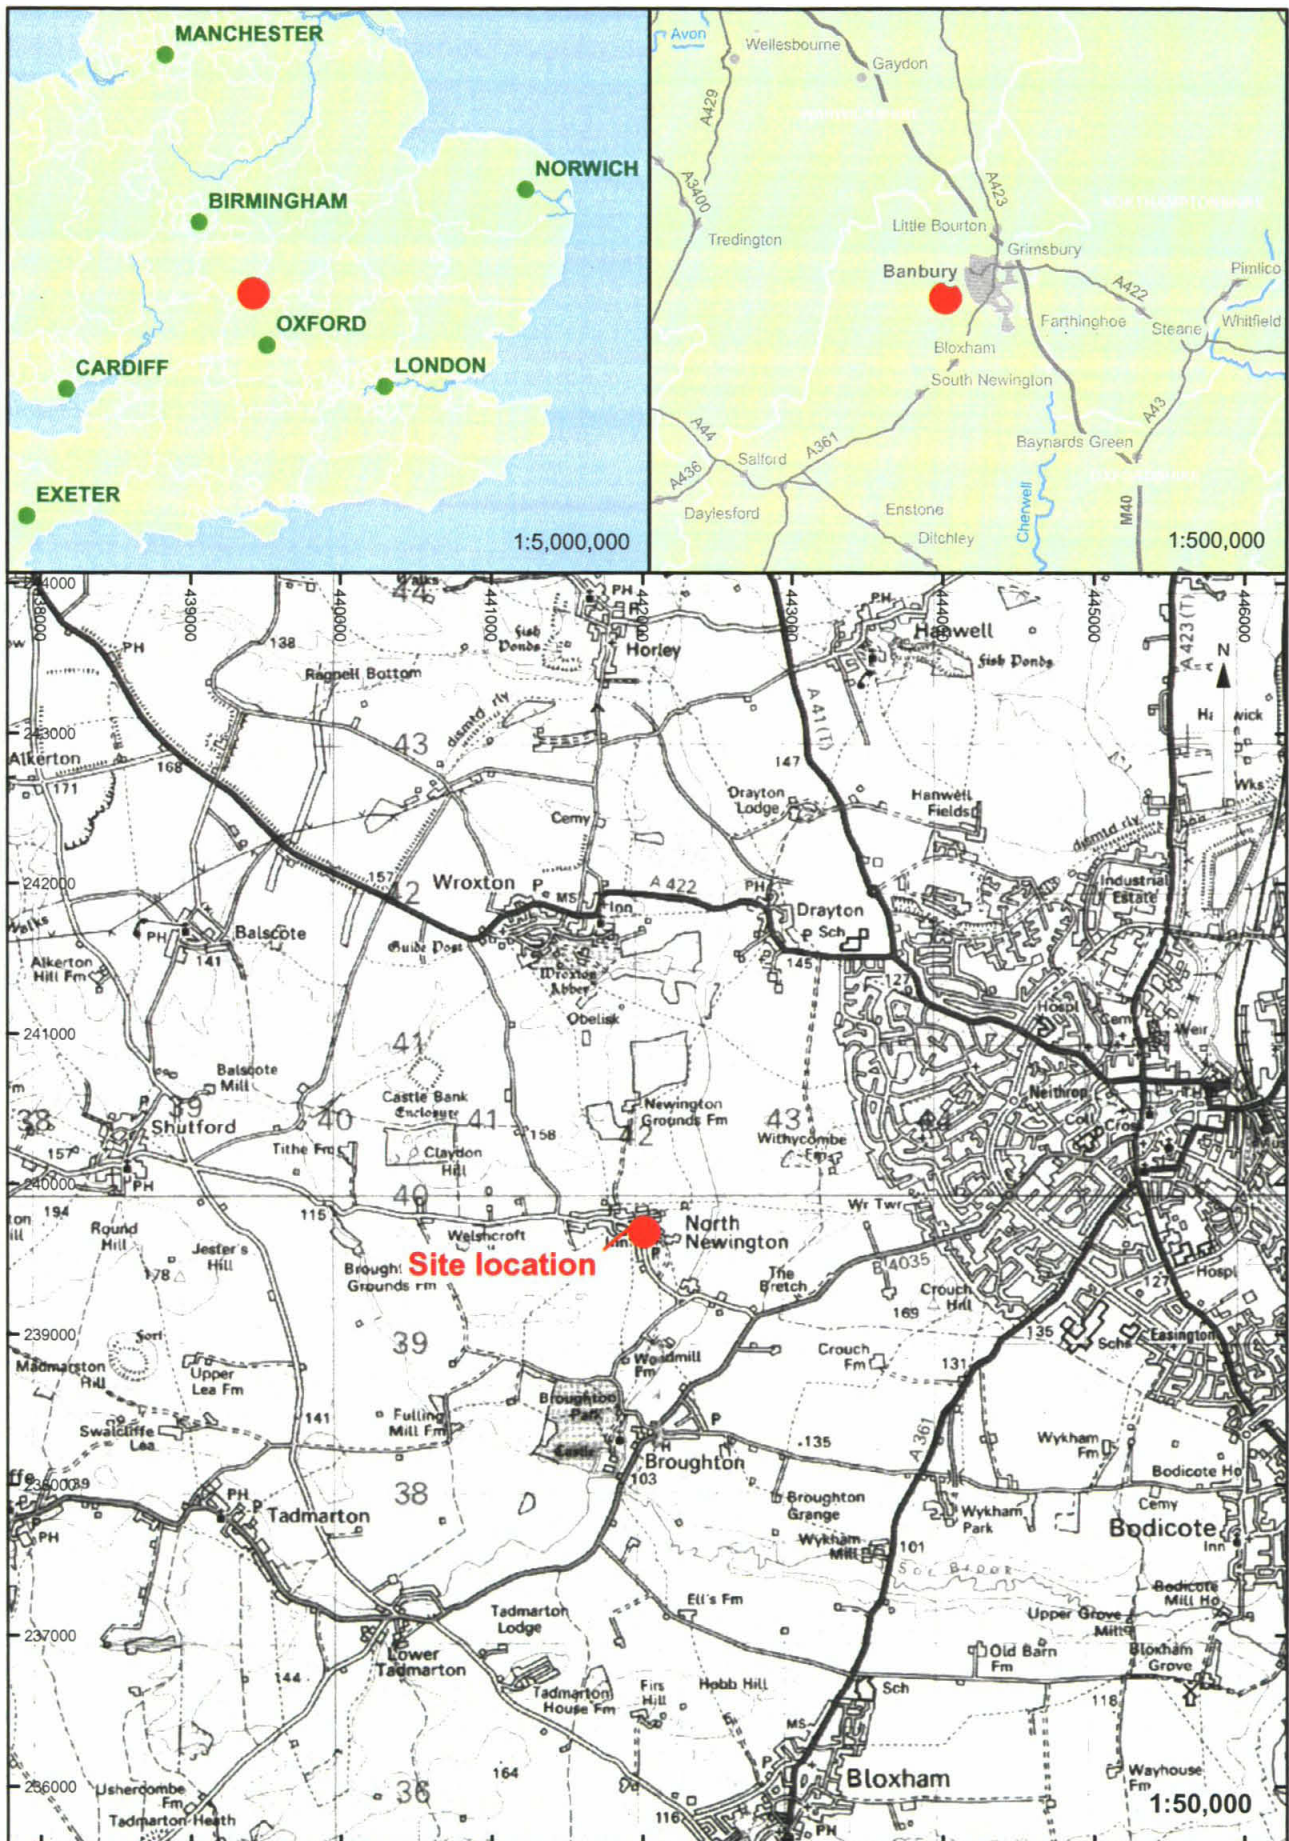

**Type of watching brief:** Monitoring of foundation trenches.

**Date and duration of project:** 1 site visit, 18/07/06

**Area of site:** 307 m<sup>2</sup>

**Summary of results:** Undated stone wall, possibly an earlier boundary wall

**Location of archive:** The archive is currently held at OA, Janus House, Osney Mead, Oxford, OX2 0ES, and will be deposited with Oxfordshire County Museums Service in due course, under the following accession number: OXCMS:2006.89

Reproduced by permission of the Ordnance Survey on behalf of
