115 - CAIRN

Good condition - Well defined, stones protruding from turf.
Diam. 2.5m height 0.3m (84/2021)

PRN 9450

A small group of cairns and four possible hut circles. The most compact part of the cairn-group (and three huts) is partly enclosed by a long fairly continuous stone bank. There is an entrance through the bank adjacent to the other concentration of cairns and it is probable that enclosure and cairnfield are all contemporary. The entrances of the huts are orientated in the same direction (north-west).
