Interpretation/Discussion:

NE - SW aligned ditch running ^{obliquely} across Trench 2. Renset a different angle to all the furrows in the area but with no direct relationship available it is impossible to say whether it is earlier or later. Like the furrows it too has a land drain in the base. A single piece of Medieval pot recovered.

7. Cut is unclear in S part between fills ~~409~~ (409) & (411).

Interpretation/Discussion:

~~A~~ - ~~S~~ Aligned deep plough furrow with initial fill (411). A modern drain was dug from surface of (411) to receive a 3' clay drainage pipe. Similar pipes occur in other E-W aligned furrows of TR4. This suggests that the pipes were laid in the furrows of a still visible ridge & furrow system that ~~was~~ subsequently has been levelled.

Interpretation/Discussion:

Basal fill of furrow [410] cut by modern trench with 3' clay pipe for drainage. Represents fill of furrow through plough activity and naturally washed in sediment. The fill produced a pottery sherd with one green glazed side, possibly of medieval date.
