(Microfiche) Chapter 1

Introduction

The material in the first two microfiches is organized to match the organization of the text and the sections correspond as far as possible. Chapter 2 in the microfiche corresponds with Chapter II in the printed text. (Note the use of Arabic numbers for the microfiche chapters and Roman for the printed text.) Chapter 3 in the microfiche corresponds to Chapter III except that in the microfiche the later Bronze Age and the Iron Age pottery are treated together and are not separated as in the printed text. Chapter 4 in the microfiche consists of additional plans and sections and a table (Table 41 on Fiche 1#42) giving details of the ovens found in the eastern enclosures. Chapter 5 again corresponds with Chapter V in the printed part with more detailed information about the finds. There are no chapters in the microfiche that correspond to Chapters VI and VII in the printed part. Chapters 1 to 4 are to be found on Microfiche 1 and Chapter 5 on Microfiche 2.

The third microfiche contains four indexes of contexts: these are of pits and hollows giving dimensions and dates for the 1957–65 and 1981–82 excavations, of post-holes giving dimensions and dates for the 1957–65 and 1981–82 excavations, of the contexts and their dimensions for the 1990 excavations, and a concordance of contexts and pottery giving dates for the 1957–65 and 1981–82 excavations.

The fourth microfiche contains the detailed plans of the site plan according to the grid given in Fig. 6.
